

Parks Canada Preliminary Screening under the *Mackenzie Valley Resource Management Act*

TYPE OF DEVELOPMENT:

- New
- Amended
- Requires a permit, licence or authorization under the *Preliminary Screening Requirement Regulations* (issuance of a Business Permit pursuant to the *National Parks of Canada Business Regulations* s 4.1)
- Does not require permit, licence or authorization and is proposed by PCA

1. DEVELOPMENT TITLE & LOCATION

Aircraft Charter Company Operations in Nááts'jch'oh National Park Reserve

2. PROPONENT INFORMATION

See " Companies Licensed to Operate in Nááts'jch'oh", page 2 of this screening

3. PROPOSED DEVELOPMENT DATES

Planned commencement: 2019-04-01

Planned completion: 2020-03-31

4. INTERNAL FILE #

NAA2019-001

5. DEVELOPMENT DESCRIPTION

Nááts'jch'oh National Park Reserve (Nááts'jch'oh) is accessed primarily by air (fixed and rotary wing aircraft) for park operational and tourism purposes; other than permit-only road access via the Howards Pass Access Road in the extreme western portion of the park. The majority of air access is facilitated by aircraft charter company outfitters. These companies must obtain Parks Canada business licences to operate in the park; according to the *Mackenzie Valley Resource Management Act* (MVRMA) their activities must undergo preliminary screening before these licences can be issued. Aircraft operations run throughout the year, though

decrease substantially and are primarily limited to park operational requirements during the fall, winter, and spring. Day flights, to drop off/pick up overnight visitors and park staff, or facilitate day sightseeing excursions, comprise the majority of charters, though occasional overnight stays are required for park operational purposes. This preliminary screening applies to the following aircraft charter companies and includes the listed activities/locations:

Companies Licensed to Operate in Nááts'jch'oh

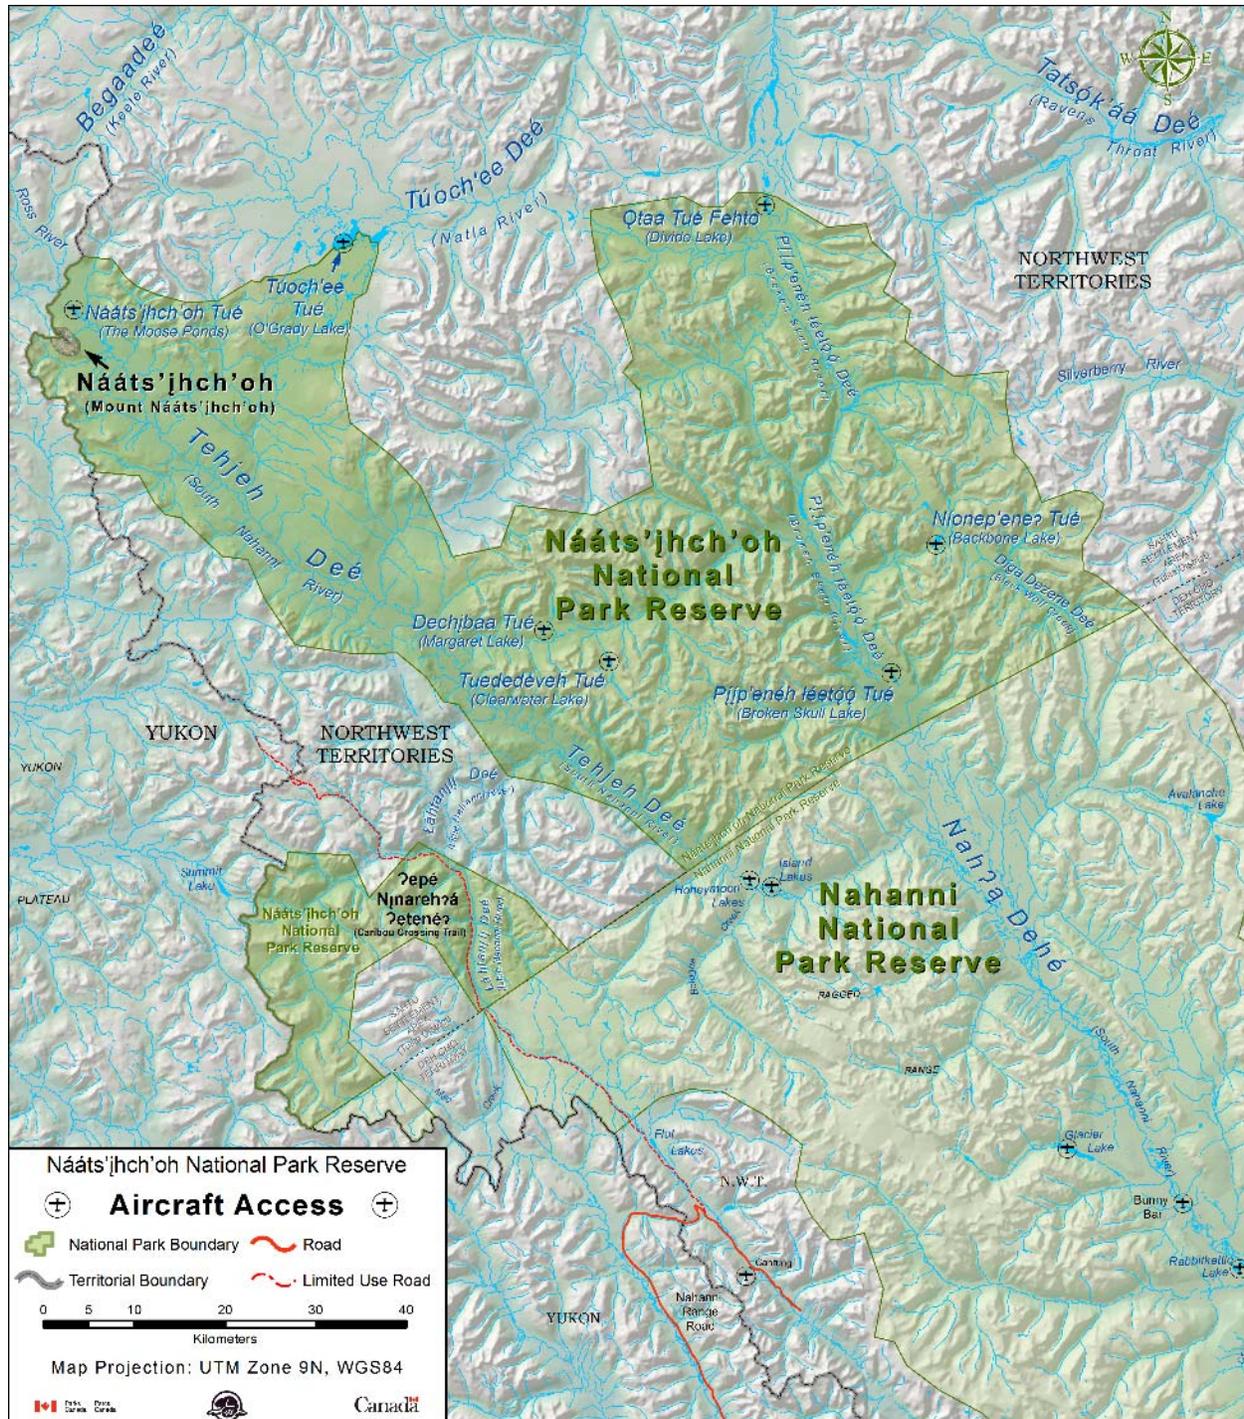

Alpine Aviation	North-Wright Airways Ltd	Summit Helicopters
Black Sheep Aviation	Sahtu / Great Slave Helicopters	Trans North Turbo Air Limited
Heli Dynamics Ltd	Simpson Air	Tundra Helicopters
Kluane Airways Ltd	South Nahanni Airways	

Activities

- Day flight seeing experiences
- Cultural flight seeing tours (Summit Helicopters)
- Commercial transport of visitors and freight for recreational activities such as hiking and river trips
- Nááts'jch'oh NPR operational activities
- Transport of researchers for purposes outside of park operational activities

Locations

Note: all flight start/end locations are from designated airports/aerodromes outside of the park.

Air Based Activity Non-Designated Landing Locations Permitted Annually

Naáts'ihch'oh

- (a) Níonep'eneᑭ Tué (Backbone Lake /Grizzly Bear Lake): 62° 40' 59.3"N, 127° 49' 12.25"W
- (b) Qtaa Tué Fehto (Divide Lake): 63° 1' 16.86"N, 128° 10' 47.64"W
- (c) Naáts'ihch'oh Tué (Moose Ponds): 62° 55' 6.68"N, 129.682385"W
- (d) Túoch'ee Tué (O'Grady Lake): 62° 59' 10.57"N, 129° 40' 56.59"W

(e) Tuededéveh Tué (Clearwater Lake): 62° 34' 21"N, 128° 31' 34.79"W

(f) Howards Pass Access Road

6. VALUED COMPONENTS

Note: Aircraft charter companies have utilized many of the takeoff/landing locations since the 1960's and 70's; many have been surveyed for natural and heritage resources (these surveys are ongoing) and areas of significance are avoided/respected by pilots and their clients.

Soil/Land Resources

- The park is located within the Taiga and Boreal Cordillera Ecological regions of the Northwest Territories. These regions include a complex landscape of rugged peaks and ridges, rolling hills, eroded plateaus, deep V- and U-shaped valleys, fast-flowing braided rivers and streams and slow-flowing meandering rivers, and in the south and west, glaciers and icefields. Glacial deposits are widely distributed and occur mainly on the floors and lower slopes of valleys, lakes and ponds are small and sparsely distributed, and wetlands are locally common only on the floodplains and lower slopes of large rivers and on a few broad plateaus. It is an area of discontinuous permafrost (ECG, 2010).

Air/Noise Quality

- No formal observations of air/noise quality have occurred in the park, however it is expected that these valued components are excellent and representative of its natural state. The majority of the park is zone II Wilderness, which represents extensive areas that are good representations of a natural region and are conserved in a wilderness state and in much of Zone II, visitors have the opportunity to experience remoteness and solitude. Motorized access is not permitted except for controlled air access (Parks Canada, 2017).

Aquatic Resources

- No SARA-listed fish species have been reported in the South Nahanni River watershed or in the Nahanni North Karst area (Babaluk, 2015), however Bull Trout (*Salvelinus confluentus*) has designated by COSEWIC as Special Concern. Bull Trout have not been found upstream of Virginia Falls.
- The South Nahanni River is silt-laden (March and Scotter, 1975), as is common of many of the rivers and streams in this area as they flow through glacial deposits (ECG, 2010).

Flora and Fauna

- Wildlife congregation areas (caribou, migratory birds) are present in the park and vary seasonally.
- Interaction with SARA-listed species in the park (i.e.: Collared pika (*Ochotona collaris*), Caribou (*Rangifer tarandus* - boreal population), Woodland caribou (*Rangifer tarandus caribou* - Northern Mountain population) and other species of special significance such

as COSEWIC-listed species will be minimal if the mitigation measures described in this screening are followed.

Social/Cultural Environment (including Wildlife Harvesting)

- Harvesting (wildlife, plants, and trees) and motorized access for traditional activities within park boundaries is a right of local First Nations and Sahtu Métis (Parks Canada 2017).

Heritage Resources

- Heritage resources are defined as a human work, an object, or a place that is determined, on the basis of its heritage value, to be directly associated with an important aspect or aspects of human history and culture of an heritage area (Parks Canada, 2013). Heritage resources include archaeological or historic sites, burial sites, artifacts and other objects of historical, cultural, or religious significance, and historical or cultural records (MVRMA (s.2)). Heritage resources exist throughout both the park. Although surveys have been conducted to identify these resources at certain locations at key lakes there remains a high potential for the presence of undocumented resources throughout the park.

7. EFFECTS ANALYSIS

See "*Parks Canada Best Management Practice (BMP) for Aircraft Operations and Landings in Nahanni and Nááts'jch'oh National Park Reserves of Canada*" (Appendix 1).

8. MITIGATION MEASURES

Aircraft charter company operators will adhere to mitigations described in the "*Parks Canada Best Management Practice (BMP) for Aircraft Operations and Landings in Nahanni and Nááts'jch'oh National Park Reserves of Canada*" (Appendix 1) and, when applicable, the *Fuel Caching Protocol for Nahanni National Park Reserve and Nááts'jch'oh National Park Reserve*.

9. OTHER CONSIDERATIONS

- ❑ Surveillance
- ❑ Follow-up monitoring, general
- ❑ Follow-up monitoring, required by legislation or policy (indicate basis of requirement e.g. required by the *Species at Risk Act*)
- ❑ SARA Notification

10. SIGNIFICANCE OF RESIDUAL ADVERSE EFFECTS

Given the limited and short-term magnitude of effects, the location in predominantly pre-impacted areas, and the application of mitigation measures the development is not expected to cause residual adverse effects to natural/cultural resources or visitor experience.

11. EXPERTS CONSULTED

<i>Department:</i> Parks Canada / Government of Canada	<i>Date of Request:</i> January 9, 2018
<i>Expert's Name & Contact Information:</i> Patrick Carroll PO Box 750, Fort Smith, NT X0E 0P0 Patrick.carroll@pc.gc.ca / Tel: 867-872-7936	<i>Title:</i> Cultural Resource Management Advisor, SW NWT Field Unit
<i>Expertise Requested:</i> General information on heritage resource surveys/inventories	
<i>Response:</i> See information in section 6 (Valued Components)

12. DECISION

Taking into account the analysis and implementation of mitigation measures outlined in the analysis, the development:

- Might have a significant adverse impact on the environment, and the proposal should be referred to the *Mackenzie Valley Environmental Impact Review Board* for environmental assessment.
- ✓ Does not have a likelihood of causing significant adverse impact on the environment.
- Might be a cause for public concern, and the proposal should be referred to the *Mackenzie Valley Environmental Impact Review Board* for environmental assessment.
- ✓ Does not have a likelihood of causing public concern.

13. APPROVAL

Updated by: <i>Faye d'Eon-Eggertson</i> Resource Conservation Supervisor, Nááts'jch'oh National Park Reserve, Parks Canada	Date: February 12, 2019
Original Prepared by: <i>Jacquie Bastick</i> Impact Assessment Specialist, Natural Resource Conservation Branch, Parks Canada	Date: March 22, 2018
Approved by:  <i>Laani Uunila</i> Superintendent, Nááts'jch'oh National Park	Date: March 4, 2019
