Subject: IR Responses - Water Quality Information

Ranjit:

GNWT-RWED has requested under their Information Request #3 for information on effluent quality from other lead zinc mines such as Polaris, Nanisivik and Pine Point.

As well, DIAND requested under IR #7 information on water quality from Cantung during operations prior to 1986.

CZN does not have ready access to such information. However, all such information would have been collected pursuant to Surveillance Network Programs and submitted to DIAND.

We would like to request that DIAND supply such information as is available in its files directly to the MVEIRB.

We appreciate your assistance in this matter.

Regards,

Peter
