**Subject:** CZN Project: IRs on Water Quality

Peter:

This refers to your e-mail on existing water quality for other lead-zinc mines such as Polaris, Nanisivik and Pine Point.

After discussion with our Water Resources staff, I have been informed that we do not have the data for Polaris and Nanisivik, as they have been transferred to the Nunavut Water Board and any request for the information should be made to them.

For your information, we are in the process of retrieving the data for Pine Point.

Regards

Ranjit Soniassy
