Subject: Workplan for Consolidated Goldwin assessment

Attached is the Review Board's Workplan for the environmental assessment of Consolidated Godwin Ventures' proposed diamond exploration program. It describes the process, roles, and estimated schedule for the assessment.

Project details are available on the Mackenzie Valley Land and Water Board's web page for this screening. It is:

<http://www.mvlwb.com/scr/search.php?landid=%20417>

Additional project description information is available on the Review Board's web site, at:
<http://www.mveirb.nt.ca/asp/Results.asp?ProjectID=68&cid=18>

To summarize based on the information already available, this development is a diamond exploration program (*not* a diamond mine) over approximately six areas.

- One area is a small bay approximately halfway between Moose and Drybones Bays.
- Another area is called the FC claim, and includes a drill target in the northern part of Moose Bay, and two in the area of Moose Lake.
- The Moose Claim, north of Moose Lake, contains multiple drill targets.
- Another drill target (in an area known as the JJ Claim) is approximately five kilometers west of the north-east arm of Defeat Lake;
- An area called the Cleft Claim (north of Moose Bay and west of the southern end of defeat Lake) is another target area.
- The ZZL Claim is on the northeast branch of Zigzag Lake, and contains a drilling target.

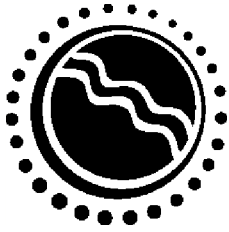

CGV appears to want to drill one to three holes in each of the six areas. Drill rigs need a ten by ten meter clearing. Most of the work will be supported by helicopter, but snow machine access is proposed to many of the sites. A small camp, movable by helicopter, is proposed. The work would occur in winter, likely February to April. The exact locations of the drill holes cannot be known in advance, and may be on land or on lake ice.

The Review Board will now begin to draft and issue Information Requests. **Parties can propose information requests to the Board, and are encouraged to begin considering what information they require from the developer or any other party.** More details regarding information requests will be sent out soon.

Regards,

Alan Ehrlich.
