Mr. More,

You challenge my motives that as a "developer in order to ensure a full understanding of the GNWT processes and data access systems." and you further denigrate me by saying that, "By not contacting the PWNHC at an earlier time, it appears that Mr. Stephenson has not acquired that basic understanding or appreciation."

Sir, I challenge you to say I do not know the process or a have a basic understanding. That is demonstrating what I have maintained all along that this process has not been respectful. It is a personal attack, that is unwarranted by a government official.

I fully understand the process. I fully appreciate the data access available. For you to respond in the way you proves the old adage that "it is better to keep your mouth shut and let them think you are a bureaucratic fool then open it and dispel all doubt."

The public meeting is for this proposal - not for your own personal agenda. You response has discredited your neutrality.

Laurence Stephenson. P. Eng. B.Sc. M.B.A.

Subject: RE: SIRC:GNWT Response to IR 1.2

Thx Alan

I should point out the disparity between the IR posed by the GNWT and Mr. Stephenson's IR response. We encourage cooperative approaches between our departments such as the PWNHC and developers in order to ensure a full understanding of the GNWT processes and data access systems. By not contacting the PWNHC at an earlier time, it appears that Mr. Stephenson has not acquired that basic understanding or appreciation.

However, the Hearing will allow an opportunity for clarity to be added.

Respectfully

Gavin More
