

process/methods

Follow Up and Monitoring

Separate monitoring agency?

what to monitor?

what are thresholds

adaptive management

community/social thresholds are unknown

community/social monitoring who/what determines indicators

community specific

single mine or regional?

how does Nunavut enforce hiring quotas?

socio-economic agreement

community based monitoring board

ongoing monitoring, mitigation, adaptive management

streamlining of follow up and monitoring - ONE diamonds board?

cumulative impact assessment

lessons learned from other mines

capacity

regulator enforcement

aboriginal community monitoring

DeBeers staffing

what does ISO 14001 certification mean for governments?

enforceability of socio, enviro agreements

MVEIRB capacity to deal with this and all the other ongoing development

Regulatory vs EA

regulator reluctance to limit scope

Traditional Knowledge

TK to be used in project design from the start

community involvement/integration of TK

hunters and trappers should be part of monitoring

TK to be involved in wildlife, fish ... early on

importance of traditional values in project desing

Baseline information

are the right things being measured?

does it go back far enough?

community involvement

involvement in project planning

consultation with Ft. Resolution Metis Nation

DeBeers should include Ft. Resolution in consultation process

IBA/donations for Ft. Resolution (Equity)

aboriginal involvement in project design

consultation, IBA, donations, which groups?

community monitoring of social impacts
