DEVELOPER'S ASSESSMENT REPORT

2009

ACKNOWLEDGEMENTS

Dezé Energy Corporation Ltd. wishes to acknowledge the efforts of the dedicated team responsible for creating this report:

Cambria Gordon Ltd. for coordinating environmental works and assessments;
D. Epp for providing technical writing and editing services;
Golder & Associates Ltd. for environmental and socio expertise and assessments;
Greenwood Environmental Inc. for providing environmental expertise and assessments;
Maskwa Golder Environmental Ltd. for drafting the environmental management system;
Nonacho Lake Fishing Lodge for providing local knowledge and field assistance;
Northwest Territories Power Corporation and the staff at Twin Gorges for their support;
NWT Energy Corporation (03) Ltd. for providing team leadership and guidance;
Rescan Environmental Services Ltd. for providing environmental expertise and assessments;
Robinson Trucking Ltd. (RTL) for assistance in winter road layout and logistics;
Solstice Consulting for coordinating engineering and design works and providing engineering expertise;
Terra Firma Consultants for providing socio-economic expertise and assessments;
Teshmont Consultants Inc. for providing engineering and design on the transmission line and structure works;
Valard Construction Ltd. for providing construction engineering on the transmission line and structure works; and
Wilson Hydrotechnical Services for providing hydrological expertise.

Dezé would also like to extend a special thank you to the residents of the South Slave region for providing local knowledge and for sharing their Traditional Knowledge of the land and environment.

Paper used in the production of this document is 100% recycled paper and is
FSC approved (supporting responsible use of forest resources)
The paper was manufactured with windpower.

To conserve energy, resources and the environment,
Appendices to this document are included on disk.
