**Re: EA0708-007 Taltson Hydroelectric Expansion Program – Deze Energy Corporation**

To the distribution list:

The Mackenzie Valley Review Board met to discuss the environmental assessment of Deze Energy Corporation's proposed Taltson Hydroelectric Expansion Project and they have set several key dates in upcoming months. The schedule over the next three months is as follows:

**November 30, 2009:** Submission of any comments or results of meetings that the parties wish to advise the Review Board of regarding the Draft Environmental Monitoring Program provided by the developer

**December 11, 2009:** Final Technical Reports are due

**December 15, 2009:** Pre-Hearing Conference, all parties should attend

**January 14-15, 2009:** Public Hearing in Yellowknife, NT

Please note that the Review Board considered the issue of where to hold the public hearing and determined that the most appropriate location would be Yellowknife and the hearing would last two days. If any party has concerns regarding the cost of attending a hearing in Yellowknife, please contact me and we can discuss

these concerns further. Any other comments or concerns regarding these upcoming due dates and activities can also be addressed to me, either by email at [ttestart@reviewboard.ca](mailto:ttestart@reviewboard.ca) or by telephone at (867) 766-7066.

Thank you for your continued participation in this environmental assessment.

Regards,

Tawanis Testart, EAO
