RE: EA0708-007

Dear Board Members:

For the Environmental Sustainability and Security of the Great Slave Lake area and the Mackenzie River Valley area I request that the Giant Mine Remediation Project "Frozen Block Plan" undergo an Environmental Impact Review.

Yours very truly,

Signature W. Heuts

Print your name W. Heuts

There is enough poison stored at Giant Mine to kill every person on Earth.

Some people who don't live in the North think the 237,000 metric tonnes of Arsenic Trioxide stored 80 feet below surface at Giant Mine should be frozen as it is. They want us to live with it. Their cleanup plan only buries the contaminated soil on surface and does not make one gram non-toxic.

Some people who live in the North think this poison should be made safe.

If you have concerns about leaving this toxic legacy to your children, grand children and future generations fill out this form and drop it off at, or mail it to, the address shown below before August 15, 2008.

YOU CANNOT RELY ON OUR
SOCIETY INSTITUTIONS TO SURVIVE
LONG ENOUGH TO MAINTAIN
THE GIANT ARSENIC IN A
FROZEN STATE; CONSIDER!

- 1) DISEASE EPIDEMIC - BIRD FLU
- EBOLA
- 2) WAR - BIOTERROR
- NUCLEAR WAR
- 3) ECONOMIC COLLAPSE
- PEAK OIL + NG
- ENERGY CRISIS
- 4) RUNAWAY GLOBAL WARMING
- 5) AGRICULTURAL CRISIS
