Re: Recent materials on Public Registry

DISCLAIMER

The Review Board has agreed to post certain materials related to the Giant Remediation EA on its public registry at the request of federal officials. These materials were developed after the Review Board's EA report was sent to the federal Minister and are not part of the record in that proceeding. The Review Board is not yet in receipt of a decision by the Minister.

These materials are being placed on the registry in the interests of full disclosure and transparency and in order to assist parties involved in deliberations on the report of EA to be aware of communications and analyses which may affect their interests. Whether these materials play any further role in the Review Board's decision-making process will depend on the federal Minister's decision.
