

Instructions for downloading the Developer's Assessment Report for Tyhee NWT Corp.'s Yellowknife Gold Project.

Due to the large file size of the overall Developer's Assessment Report and Appendices, the main document and supporting appendices had to be divided before posting to the online registry.

Online file titles indicate the subject matter the file contains as well as pertinent numerical information. For example, for the "Main Document" of the Developer's Assessment Report, the online file title " 02 YGP DAR Existing Environment and Baseline Conditions [148-230]" refers to "section 2" of the main document and [148-230] refers to the page number as the numbers appear on the text of the document. Most appendices are single files, but Appendix B and Appendix D are divided according to manageable file sizes for online use. For clarity, the titles B.1 through B.6 refer to the order of the divisions for Appendix B; Appendix D has a similar format.

The Table of Contents, Concordance Table and List of Appendices are available as single files and can assist with navigation through the online documents and files. Please contact the Review Board for any questions.
