Re: EA1314-01 – Jay Project, Review Board meeting with Dominion Diamond

The Review Board met with Dominion Diamond (Dominion) on February 26th, 2015 to go over the information requests (IRs) that were received on February 23. The Review Board informed Dominion that it was working on organizing the IRs by topic. The organized table will be put onto the registry within the week. Dominion indicated that it would aim to respond to the IRs in two phases: one round of responses will likely come in on March 20th and the second round of responses will come in by April 7th.

The dates for the technical session were also discussed. The technical session dates will now extend from the afternoon of Monday April 20th through the morning of Friday April 24th, 2015. An agenda for the technical session will be released in the coming weeks. As a reminder to all parties, the CVs for technical experts need to be received prior to the technical session.

Finally, Chuck Hubert will be away until March 23rd. Please contact Sachi De Souza with any Jay project-related questions.
