**Subject:** Re: Environmental Assessment Notification

LEt me know when you finish with the BS and whether or not mineral exploration will be allowed in the NWT. I have advised the company that it should contact the federal minister with respect to getting his involvement to see if there is any point in continuing to try.

Further I am forwarding this to the Mining Recorder in the NWT and asking for a general moratorium on assessment requirements in the whole region of the Drybones bay are since there appears to be no bounds to the effective MEVIRB's moratorium on mineral exploration in this area - 50 kilometres - 50 shimometres if you had your way I am sure the diamond industry would not exist!

**Subject:** Environmental Assessment Notification

Please see the attached letter, which is an official notification that the proposed work by Consolidated Goldwin Ventures has been called up for Environmental Assessment.

Alan Ehrlich  
Senior Environmental Assessment Officer
