RE: EA0607-002-Tamerlane Ventures, Round 2 IR's

Dear Mr. MacDonald;

The Fort Resolution Metis Council, as harvesters and stewards of the land feel that further studies should be initiated before development.

We strongly feel that a study on the Woodland Caribou, should be initiated before development; as they are a Species at Risk, and are known to the local harvesters as being in the area of the project. This topic was a little overlooked in the Traditional Knowledge study done in Fort Resolution, and not addressed in enough detail in the DAR, that we feel as it should. We hope to have this study addressed before the permit is issued.

We feel that the water issues that were addressed at the hearing in Hay River should be followed up with a new water study on Great Slave Lake near the proposed project to identify the levels of concentrated metals and trace elements in the water and in the aquatic life before/During and after the Pilot Project as the last one known to us was done ten years ago.

We would like to see these studies initiated prior to or during the project by both the developer and the Federal or Territorial Governments.

This letter is neither to condemn or support the Pilot Project but merely a way for the Fort Resolution Metis Council to ensure that we are being stewards of the land, and that these issues will be initiated or dealt with before or during the Pine Point Pilot Project.

Thank You;

Kara King
FRMC President

C.C.: Chris Heron, NWTMN IMA Coordinator
David Swisher, Senior Project Manager, Tamerlane Ventures Inc.
