BY EMAIL

Mr. Mark Cliffe-Phillips
Executive Director
Mackenzie Valley Environmental Impact Review Board
200 Scotia Centre
PO BOX 938
YELLOWKNIFE NT X1A 2N7

Dear Mr. Cliffe-Phillips:

Report of Environmental Assessment and Reasons for Decision for Jay Project (EA1314-01) Measure 13-4: 2020-2021 Annual Reporting from Regulatory Authorities

The Mackenzie Valley Environmental Impact Review Board's (Review Board) Report of Environmental Assessment and Reasons for Decision (Report of EA) for the Jay Project at the Ekati mine site included Measure 13-4: Annual Reporting from Regulatory Authorities.

The attached report represents the Government of the Northwest Territories' (GNWT) annual reporting from July 1, 2020 to June 30, 2021. The Review Board should note that since the Jay Project has been continually delayed, it is difficult to assess the effectiveness of measures implemented as required by EA1314-01. As a result, the GNWT is only able to explain how the implementation actions fulfil the intent of a limited number of EA measures at this time.

The GNWT is also aware of the recent ownership change for the Ekati mine site. As all Dominion Diamond Ekati ULC (Dominion) authorizations were transferred to the Arctic Canadian Diamond Company Ltd. (ACDC) in February 2021, moving forward, our annual reports will reference ACDC as the responsible party for measures originally assigned to Dominion. However, the measures, as written in the Report of EA, will remain unchanged and still reference Dominion.

The GNWT is sharing the attached 2020-2021 Annual Report on Implementation of Jay Project Measures outlining all measures and responding to those assigned in whole or in part to the GNWT and the progress made to date. The GNWT has and will continue to file this report annually in response to Measure 13-4. Measures assigned wholly or in part to the GNWT are:

- Measure 4-4: Dike stability and safety;

.../2

- Measure 6-1(d): Road mitigations from caribou impacts;
- Measure 6-2(a)(iii & iv): Caribou offset and mitigation plan;
- Measure 6-2(b): Research to design and implement successful offsetting projects;
- Measure 6-3: Air Quality Emissions Monitoring and Management Plan;
- Measure 6-4: Dustfall standards;
- Measure 6-6: Timely completion of caribou management plans;
- Measure 8-1: Minimize negative socio-economic impacts of the Project on communities;
- Measure 9-1: Incineration – Stack testing and reporting; and,
- Measure 13-4: Annual reporting from government and regulatory authorities.

Measures not assigned to the GNWT but requiring GNWT participation, such as approval of Dominion/ACDC mitigation or management plans, are included in the table as well. The GNWT will continue to participate where appropriate, in the review processes for measures assigned to Dominion/ACDC and other regulatory bodies, review Dominion/ACDC monitoring, management, and mitigation plans, and carry out compliance and enforcement duties where required.

As appropriate, the GNWT will continue to consider the Review Board's suggestions as set out in the Report of EA.

The GNWT will continue to work with resource management boards, ACDC and parties to the Jay Project Environmental Assessment on measure implementation and reporting and would be pleased to participate in any discussions that the Review Board or others may arrange. Should the Review Board or any parties have any questions regarding the attached materials, please contact Katie Rozestraten, Project Assessment Analyst, by email at katie_rozestraten@gov.nt.ca.

Sincerely,

Lorraine Seale
Director, Securities and Project Assessment
Lands

Report on Implementation of Jay Measures – GNWT 2020-2021 Annual Report

Preamble

The Government of the Northwest Territories' (GNWT) responses in the “Detail on Measure Progress” column are formatted in response to the Measure 13-4 criteria, outlined below for reference.

Measure 13-4: Annual reporting from government and regulatory authorities:

In order to evaluate the effectiveness of mitigation measures for the protection of the environment, each regulatory authority or government that is wholly or partly responsible for implementation of any measure in this Report of EA will prepare an annual Report on Implementation of Jay Project Measures. The Report will:

- a) describe the actions being undertaken to implement the EA measures or the part(s) of the EA measure for which the regulatory authority or government is responsible; and
- b) explain how the implementation actions, including any actions implemented through adaptive management, fulfill the intent of the EA measures, including consideration of the following questions:
 - i. How are implementation actions addressing a likely significant adverse impact on the environment?
 - ii. How effective are implementation actions at reducing, controlling, or eliminating the impact or its likelihood?
 - iii. If the measure is for monitoring or research, are the implementation actions clearly linked to mitigation and/or operations?
 - iv. How are process considerations (such as consultation or engagement requirements, statutory obligations, etc.) being considered, and, if applicable, how are they affecting implementation of the EA measures?

Prior to July 1 of each year, during all phases of the Jay Project to which a particular measure applies, each regulatory authority and government will provide a copy of this annual report to the Review Board.

Note: Arctic Canadian Diamond Company Ltd. (ACDC) is now responsible for measures originally directed to Dominion Diamond Ekati Corporation. To avoid confusion, we have not altered the text of the measures with the updated company name. But moving forward, our responses, where necessary, will refer to the new company, ACDC.

Discipline	Measure	Text of Measure	Party Responsible	2018-2019 detail on measure progress for measures assigned in whole or in part to the GNWT. The GNWT responses are separated into sections of Measure 13-4.	2019-2020 detail on measure progress for measures assigned in whole or in part to the GNWT. The GNWT responses are separated into sections of Measure 13-4.
Impacts to Water quality	4-1: Closure objectives	To prevent significant cultural impacts after closure from changes in water quality, the Wek'èezhì Land and Water Board will set closure objectives and criteria for the Jay Project components so that Dominion ensures that the area is suitable for traditional uses after closure. Closure objectives and criteria will be set for, but not limited to, the following components of the Jay Project - Jay pit, Misery pit, Lynx pit, Jay waste rock storage area.	Wek'èezhì Land and Water Board (WLWB), Arctic Canadian Diamond Company Ltd. (ACDC) replaces Dominion Diamond Ekati ULC (Dominion), formerly known as Dominion Diamond Ekati	Measure is not directed to the GNWT. 			Corporation (DDEC)			
Impacts to Water quality	4-2(a): Site Water Management Plan	<p>In order to avoid significant impacts to traditional use in the vicinity of the Jay Project after the Jay Project mining and closure have been completed, Dominion will submit a site water management plan to the Wek'èezhì Land and Water Board for approval, prior to the commencement of dike construction. Dominion will demonstrate how its plan, and the contingencies within, will ensure water quality in the Jay Pit, Misery Pit, Lac du Sauvage, Lac de Gras and downstream will support traditional uses in the vicinity of the Jay Project after closure, while protecting the environment during operations. The plan will include, but not be limited to:</p> <ul style="list-style-type: none"> • a list of contingencies that Dominion can use to manage water during operations and an evaluation of the feasibility of each • a description of the scenarios (i.e., conditions and timing) under which contingencies will be implemented • Dominion's preferred contingencies, with rationales, for each scenario • a description of how Dominion will monitor the quantity and quality of water, to: <ol style="list-style-type: none"> a) calibrate the water models used to make predictions in the EA b) assess the suitability of contingencies c) evaluate the performance of contingencies used 	ACDC	Measure is not directed to the GNWT. The GNWT will continue to participate in review processes as required.	Measure is not directed to the GNWT. The GNWT will continue to participate in review processes as required.	Measure is not directed to the GNWT. The GNWT will continue to participate in review processes as required.
Impacts to Water quality	4-2(b): Pit lake water quality	<p>To ensure that water quality in the Misery pit and Jay pit is compatible with traditional uses of the area in vicinity of the Jay Project and downstream after closure, Dominion will:</p> <ol style="list-style-type: none"> 1. establish meromixis for the Jay and Misery pits 2. stabilize meromictic pit lakes for the long-term <p>If the above requirements cannot be met, Dominion will develop and implement contingencies to ensure the pit lake water quality is compatible with traditional use after closure. Dominion will submit a list of these contingencies, which describe the feasibility of each contingency, and the conditions and timing under which each would be implemented, to the Wek'èezhì Land and Water Board for approval prior to the implementation of any contingency.</p>	ACDC	Measure is not directed to the GNWT. The GNWT will continue to participate in review processes as required.	Measure is not directed to the GNWT. The GNWT will continue to participate in review processes as required.	Measure is not directed to the GNWT. The GNWT will continue to participate in review processes as required.

Report on Implementation of Jay Measures – GNWT 2020-2021 Annual Report

Discipline	Measure	Text of Measure	Party Responsible	2018-2019 detail on measure progress for measures assigned in whole or in part to the GNWT. The GNWT responses are separated into sections of Measure 13-4.
Impacts to Water quality	4-3: Fine processed kimberlite	To avoid significant adverse environmental impacts to the Panda and Koala pit lakes and to the downstream environment after closure from the deposition of fine processed kimberlite, Dominion will not deposit fine-processed kimberlite into the Panda and Koala pits unless the Wek'èezhì Land and Water Board approves the use of the Panda and Koala pits. The Wek'èezhì Land and Water Board's approval will ensure the protection of the downstream environment after closure and will consider the results of Beartooth pit fine-processed kimberlite trial. Otherwise, the fine-processed kimberlite will be deposited into an approved processed kimberlite containment area.	ACDC	Measure is not directed to the GNWT. The GNWT will continue to participate in review processes as required.	Measure is not directed to the GNWT. The GNWT will continue to participate in review processes as required.	Measure is not directed to the GNWT. The GNWT will continue to participate in review processes as required.
Impacts to Water quality	4-4: Dike stability and safety	To reduce the risk of dike failure and its associated significant impacts, Dominion will establish an independent dike review panel to evaluate and, if necessary, improve the design, construction, operation and maintenance of the dike. The panel will provide recommendations to the developer and the Wek'èezhì Land and Water Board to ensure that impacts to the safety of people and the environment are minimized. The panel will, at a minimum: <ul style="list-style-type: none"> • review and accept the dike design prior to the commencement of dike construction • review the dike operation Dominion will engage with the Wek'èezhì Land and Water Board, Government of the Northwest Territories and the Independent Environmental Monitoring Agency on the panel composition and tasks. Dominion will submit the review panel's final terms of reference to the Wek'èezhì Land and Water Board.	ACDC	The GNWT's role in this measure was to engage with Dominion on the panel composition and tasks. This was completed in 2016 and the GNWT does not have any outstanding obligations associated with this measure. The GNWT's letter can be viewed on the public registry here .	The GNWT's role in this measure was to engage with Dominion on the panel composition and tasks. This was completed in 2016 and the GNWT does not have any outstanding obligations associated with this measure. The GNWT's letter can be viewed on the public registry here .
Fish and Fish habitat	5-1: Protection of the Narrows	To mitigate significant adverse ecological and traditional use impacts resulting from unacceptable drops in water levels at the Narrows, Dominion will maintain water levels at the Narrows such that the Jay Project does not adversely affect fish passage and the continuation of traditional use of the area as an open water source. It will do so by monitoring the Narrows before and during closure, and by appropriately managing activities in Lac du Sauvage during closure. Prior to construction, a description of this monitoring will be submitted to the WLWB for its approval as part of the Aquatic Effects Monitoring Program design plan. The monitoring results will be reported in the annual AEMP	ACDC	Measure is not directed to the GNWT. The GNWT will participate in review processes as required.	Measure is not directed to the GNWT. The GNWT will participate in review processes as required.	Measure is not directed to the GNWT. The GNWT will participate in review processes as required.

Impacts to Caribou	6-2(a): Caribou offset and mitigation plan	i. Dominion will offset residual adverse impacts to caribou by human activities that cumulatively affect the Bathurst caribou herd, beyond direct impacts of the Jay Project. Dominion will set out these offsets in a Caribou Offset and Mitigation Plan, which it will complete within one year of Minister’s acceptance of this Report of EA. This plan will be in force throughout the duration of the Jay Project.	ACDC	Measure 6-2(a)(i) is not directed to the GNWT. The GNWT will participate in review processes as required. 		<ul style="list-style-type: none"> implement an interim herd recovery strategy towards a sustainable and ongoing Aboriginal harvest 		<p>previous 2016-2019 Joint Proposal. The goal of the management actions are to halt the Bathurst herd's decline and promote recovery.</p> <ul style="list-style-type: none"> On May 10, 2019, the GNWT submitted the Bathurst Caribou Range Plan (BCRP) to the WRRB for consideration as a management proposal under Section 12.5.1 of the Tłı̨ch̨ Agreement. The BCRP contains nine management recommendations, including a cumulative land disturbance framework that contains tiered development thresholds that together will guide the GNWT and co-management partner actions to ensure the Bathurst annual range is in a resilient landscape condition. The GNWT has been working with the Conference of Management Authorities (CMA) to draft a Recovery Strategy for Barren-ground Caribou. The proposed strategy is being drafted in part based on the GNWT's Barren-ground Caribou Management Strategy for 2017-2021 (outlined in the May 2018 Response), but modified to reflect priorities of all comanagement partners party to the CMA. A proposed recovery strategy will go out for public consultation and engagement from August to November 2019. The GNWT, in collaboration with the Bathurst Caribou Advisory Committee (the mechanism established in 2017 for long-term management of the Bathurst Herd), recently issued a contract to Great Bear Consulting for drafting of a management plan for the Bathurst Herd. <p>b) The GNWT's response to Measure 6-6 explains how the implementation action is intended to fulfill the intent of Measure 6-6.</p>	<p>Proposal for the Management of the Bathurst Caribou Herd.</p> <ul style="list-style-type: none"> On January 31, 2020, the GNWT and Tłı̨ch̨ Government submitted a joint proposal on management actions for wolves on the Bathurst and Bluenose-East caribou herd winter ranges: 2020-2025. This proposal is part of a wide range of management actions the two governments and their co-management partners are taking to support the recovery of these herds, including implementation of the Bathurst Caribou Range Plan. The Bathurst Caribou Range Plan (BCRP) was released on August 21, 2019. The BCRP was developed by a multi-stakeholder working group and will help decision-makers manage activities on the land in a way that supports the recovery of the Bathurst herd, while providing clarity on land use and access for developers, regulators and residents of the Northwest Territories (NWT). It includes guidance for managing the overall amount of disturbance on the land, as well as seven management tools to reduce and manage impacts to caribou and caribou habitat. Actions are currently underway to support implementation of the recommendations contained in the BCRP. The BCRP is available on ENR's website here. The Conference of Management Authorities (CMA) (which includes the GNWT) has reached consensus to accept the Recovery Strategy for Barren-ground Caribou in the NWT. As per the <i>Species at Risk (NWT) Act</i>, the recovery strategy will be publicly released by July 9, 2020, together with an accompanying CMA press release. 	<ul style="list-style-type: none"> The Wek'èezhì Renewable Resources Board (WRRB) approved a wolf management pilot project on the winter range of the Bathurst and Bluenose-East winter ranges in 2020. As part of that pilot project wolf reduction was conducted between January and May 15, 2020, by ground-based hunting and augmented by aerial shooting. The GNWT and the Tłı̨ch̨ Government submitted a new joint wolf management proposal to the WRRB on August 25, 2020. The WRRB issued their Reasons for Decision final report on January 8, 2021. A response by ENR and the Tłı̨ch̨ Government was submitted on March 12, 2021. This new proposal includes wolf research and monitoring activities to better understand wolves and their interactions with caribou. The Bathurst Caribou Advisory Committee (which includes the GNWT) circulated the Bathurst Caribou Management Plan for public review, which closed on May 31, 2021. <p>b) The GNWT's response to Measure 6-6 explains how the implementation action is intended to fulfill the intent of Measure 6-6.</p> <p>i. Details on how the implementation actions address the predicted cumulative significant impacts from the Jay Project and other human activities on the Bathurst herd are outlined in GNWT's response to Measure 6-6.</p> <p>ii. 		<p>culture camp, in a traditionally used area near the Project. This culture camp will be used by Aboriginal groups to maintain or establish a connection with disturbed areas of land and restore Traditional Knowledge transfer between generations about the area affected by diamond mining.</p> <p>Dominion will consult with Aboriginal groups that participated in the environmental assessment to decide on the location, timing and frequency of use of the culture camp. Dominion will support the camp's use and access, financially or in-kind.</p>				
Maximizing benefits and minimizing impacts to communities	8-1: Minimize negative socio-economic impacts of the Project on communities	<p>In order to mitigate significant cumulative adverse socio-economic impacts of the Jay Project on health and well-being, the Government of the Northwest Territories will engage and work with diamond mining communities to adaptively manage adverse social impacts to health and well-being from the Jay Project, in combination with other diamond mining projects. As part of this process, the GNWT will actively investigate and address linkages of diamond mining effects on the health and well-being of affected communities.</p> <p>The GNWT will also meet with communities within one year of the Ministerial approval of this Report of EA, and annually thereafter, to discuss:</p> <ol style="list-style-type: none"> 1. priority social issues at the individual, family and community level related to diamond mining, as identified by communities and by the GNWT 2. the effectiveness of GNWT programs to address these identified issues, and 3. implementing improvements to mitigate identified issues. <p>The GNWT will submit an annual progress report on the above to each diamond mining community, describing GNWT's engagement on and adaptive management of social impacts, and GNWT's plans to address identified issues.</p>	GNWT	<p>a) Measure 8-1 requires that the GNWT engage and work with diamond mining communities to adaptively manage adverse social impacts on health and well-being from the Jay Project, in combination with other diamond mining projects. As a part of the socio-economic agreements with the diamond mines, the GNWT actively monitors and reports on the socio-economic indicators to assess the impact of diamond mining on communities and extends offers to meet annually with those impacted communities to discuss priority issues, impacts, reporting mechanisms, and monitoring and mitigation activities. The GNWT merged the 2017 Communities and Diamonds report and SEA implementation report in an effort to better meet the communication needs of communities and reporting requirements. The GNWT and the diamond mines restructured community engagements in 2018 to better meet the responses heard from community members and council during the 2017 engagements. Specifically, there was an interest from the Small Local Communities (SLCs) in receiving more support and engagement with mines and government around employment opportunities and addressing employment barriers. As such, the GNWT and diamond mines held a series of trade show like events alongside meetings with Chief and Council in the SLCs.</p>	<p>There was no further advancement on work associated with measure 8-1 during the 2019-2020 reporting year due to Dominion Diamond Mines delaying the Jay Project expansion in May of 2018.</p>	<p>a) The GNWT departments continue to advance work related to Measure 8-1 in an effort to improve understandings of socio-economic impacts from mining and resource extraction more broadly and health and well-being specifically. Actions related to this measure include: collaboratively working with IGOs to develop cultural well-being measures and, more broadly, well-being as a whole; completing a jurisdictional review of existing Health and Social Impact Assessment guidance with the intent of developing clear, robust and relevant guidance for participating in assessments, implementing monitoring and mitigation tools and supporting improved assessment processes, transparency and accountability for communities, stakeholders and the public; supporting cultural well-being by way of Indigenous language preservation through the Mentor Apprenticeship Program (MAP); and, a number of legislative updates to improve employment and training initiatives that promote economic well-being, such as Bill 12 (An Act to Amend the Apprenticeship, Trade and Occupational Certification Act) and Bill 20 (An Act to Amend Employment Standards Act). The GNWT continues to monitor indicators identified in the Socio-Economic Agreements and publicly report on this work in the annual Socio-Economic</p>

				<p>Workshops were also held with: Deninu Kúé First Nation (Fort Resolution in November 2018), the Northwest Territories Métis Nation (Fort Smith in November 2018), the Yellowknives Dene (N'dilo in December 2018) and Tłıchǫ Government (Yellowknife and Behchokò in December 2018). An invitation was extended to the North Slave Métis Alliance, however, an agreeable time was not available. The GNWT will continue to refine its reporting mechanisms to better communicate their efforts to respond to the issues raised by communities.</p> <p>Mental health is a key area of concern identified in community engagement and in our work with the mining companies. As such, the GNWT emphasized reporting on available programs and services in SEA meetings and shared materials and resources in community workshops. In addition, the GNWT-HSS has been working with the diamond mines to raise awareness of mental health issues, programs and supports for mining workers and families. In June 2019, the Department of Health and Social Services (HSS) released the <i>Mental Wellness and Addictions Recovery Action Plan</i>. The action plan outlines the transformative system changes the GNWT is putting into place to pursue mental health and addictions recovery and healing, and recognizes the connections between these issues and complex socio-economic factors, life experiences, biology and genetics. It seeks to foster hope and change through four main objectives: reduce stigma and increase awareness and prevention; increase supports and transform the culture of practice within the mental wellness and addictions recovery system to more fully reflect a seamless care pathway model in the NWT; improve quality, coordination, and integration of services; and, strengthen</p>

The GNWT responses are separated into sections of Measure 13-4.
				<p>has been identified available literature, with plans to engage and collaborate with diamonding mining communities and stakeholders on this work. Implementation actions described above fulfill the intent of Measure 8-1.</p> <p>ii) HSS believes that the current actions and planning activities are improving the adaptive management and understanding of social impacts to health and well-being and that future, collaborative work in this area will result in continued and more responsive action to address priority health and wellness issues, implement improvements and mitigate issues.</p> <p>iii) The actions and information presented in this response are being used to implement actions clearly linked to mitigations and improvement in GNWT operations.</p> <p>iv) Official letters are mailed to each diamond mining community, alongside the annual SEA report, inviting Chiefs and Councils, the Northwest Territory Métis Nation Presidents, and the North Slave Métis Alliance to meet with the GNWT. The GNWT will continue to engage with the communities on a regular basis.</p>		
Socio-economic, employment	8-2: Supporting increased employment opportunities for women	To mitigate significant adverse socio-economic impacts on women, Dominion will consult with the Government of the Northwest Territories, the Status of Women Council of the NWT and the Native Women’s Association of the NWT to update its strategy for the training, recruitment and employment of women in traditional and non-traditional occupations, prior to the construction phase of the Jay Project. Where Dominion has community liaisons, they will serve as additional resources for implementing initiatives for training, recruitment and employment of women.	ACDC	This Measure is not directed to the GNWT. The GNWT co-hosted a conference in December 2018 with the Native Women’s Association of the Northwest Territories. The conference included participation from the diamond mines as well as representatives from all regions in the NWT. Topics discussed included Supporting Women in Mining, Business Opportunities with the Mines, Mine Sponsored Employee Family Assistance Programs, Employment and Training, How to Apply for a Job at an	There was no further advancement on work associated with measure 8-2 during the 2019-2020 reporting year due to Dominion Diamond Mines delaying the Jay Project expansion in May of 2018.	This Measure is not directed to the GNWT and as such, the GNWT will defer to ACDC for updates on how the company has engaged the groups. However, the GNWT would like to share how it has supported increased employment opportunities for women. The GNWT’s Department of Education, Culture and Employment (ECE) has committed to increase the participation and completion rates of targeted groups in apprenticeship and certification, including women in non-traditional trades, and to develop and

		<p>Dominion will report on employment and retention figures for women, and on the effectiveness of its revised policy, as part of its reporting per measure 13-1.</p>		<p>NWT Mine, and Engaging Youth Around Science, Technology, Engineering and Math (STEM), among others. The GNWT will continue to work collaboratively to encourage women’s participation in mining.</p>		<p>implement an initiative that will increase the number of women in the trades and occupations. ECE is currently working to develop a “Women in Trades” program to remove barriers and encourage more women to consider careers in skilled trades. Such a program will require a multi-faceted approach to addressing barriers to success experienced by Indigenous and female apprentices.</p> <p>The Mine Training Society recently delivered a program for women in trades in partnership with the federal government and a local employer. ECE supported this program by providing advice to the Society, and also by providing funding for participants. ECE is assessing support of this nature in planning for the “Women in Trades” program.</p> <p>With support of all active mines, the GNWT has been involved in regular meetings with Women in Mining, and is taking the steps to establish an NWT chapter under the NWT’s <i>Societies Act</i>.</p> <p>SEA reporting has introduced a chapter on Women, featuring statistics on female participation in the mining industry and stories about the successes of women in training and employment.</p>
Air quality, stack testing, incineration	9-1: Incineration – Stack Testing and Reporting	<p>To reduce the likelihood of impacts resulting from the release of dioxins and furans, Dominion will conduct incinerator stack testing at least every three years and submit any stack test results to the GNWT Department of Environment and Natural Resources and Environment Canada no more than 90 days after the completion of stack testing. No more than 120 days after any failed stack test, (with failure determined according to the Canada Wide Standards for Dioxins and Furans or applicable regulation or guidance developed by the GNWT), Dominion will:</p> <ol style="list-style-type: none"> 1. Develop an Adaptive Management Response Plan, containing: 	ACDC	<p>The GNWT acknowledges that Dominion provided the 2016 Emission Monitoring Report for Ekati Incinerator Stack Testing to GNWT ENR on February 17, 2017. The report satisfied the portion of Measure 9-1 that states: “<i>Dominion will conduct incinerator stack testing at least every three years and submit any stack test results to the GNWT department of Environment and Natural Resources and Environment Canada no more than 90 days after the completion of the stack testing.</i>”</p>	<p>The GNWT notes that stack testing was scheduled to occur in 2019. The GNWT, however, understands Dominion did not conduct stack tests in 2019 due to the delay in implementing the Jay Project.</p>	<p>The GNWT notes that stack testing was scheduled to occur in 2019. The GNWT understands Dominion did not conduct stack tests in 2019 or 2020 due to the delay in implementing the Jay Project. ENR will review incinerator stack test results if/when they are provided by ACDC.</p>

		<p>a) An assessment of the incinerator operations and management that contributed to the failed stack test, and methods to rectify them.</p> <p>b) A consideration of the need for increased monitoring of incinerator operational indicators associated with the formation of dioxins and furans. This may include inline continuous emission monitoring for, but not limited to: flow of flue gas, oxygen content, and carbon monoxide.</p> <p>2. Submit the Adaptive Management Response Plan to the GNWT Department of Environment and Natural Resources and Environment Canada.</p> <p>3. Implement the methods identified by Dominion (under 1a above) no later than the submission of the Response Plan, and earlier if feasible.</p> <p>Dominion will re-stack test the incinerators within six months of the initial failed stack test. This second stack test will verify the effectiveness of the methods proposed and implemented in the Adaptive Management Response Plan and demonstrate compliance with the Canada-wide Standards for Dioxins and Furans. All stack tests must be conducted in accordance with national standards, and include detailed documentation to demonstrate that representative composition and batch size of waste were used during the testing process.</p> <p>Exemptions for the second stack test may occur based on a review of the factors that contributed to the failed stack test and approval of the Adaptive Management Response plan by GNWT Department of Environment and Natural Resources, in consultation with Environment Canada.</p>		<p>The GNWT notes that stack testing is to be conducted at least every three years, and therefore 2019 would have been when the next stack testing occurred. The GNWT, however, understands Dominion intends on conducting stack testing in 2020 and anticipates receiving the test results no more than 90 days after the completion of stack testing.</p>		
Air quality, greenhouse gases	Measure 9-2: Reporting on greenhouse gas emission and management	<p>Dominion will provide, in its Air Quality Emissions Monitoring and Management Plan annual report, information on its greenhouse gas management for all Project phases including, but not limited to:</p> <ul style="list-style-type: none"> • A calculation of greenhouse gas emissions by combustion source; • greenhouse gas emissions reduction targets for the upcoming year and how they were determined; • reporting of whether past reduction targets were achieved and how, or if they were not, why; • a description of monitoring including the parameters, methods, frequency, and data analysis; • a description of adaptive policies, strategies and mitigative actions undertaken, or proposed, to 	ACDC	<p>Measure is not directed to the GNWT. The GNWT will participate in review processes as needed, including any reviews of the Air Quality Emissions Monitoring and Management Plan (AQEMMP) and the AQEMMP report.</p> <p>The AQEMMP that the GNWT approved in May 2017 states that "DDEC will include the information required under Measure 9-2 from the Report of EA as part of the GHG Management Report. A copy will be reproduced as an appendix in the AQEMMP annual report."</p>	<p>Measure is not directed to the GNWT. 		<p>reduce greenhouse gas emissions, including but not limited to:</p> <ul style="list-style-type: none"> ○ the results of Dominion’s proposed ore hauling pilot study, including a description of greenhouse gas emissions for each alternative hauling method studied compared to existing and/or proposed strategies; ○ the results of Dominion’s proposed concept study on the use of alternative energies to offset a portion of the Jay Project’s energy needs, including the methods and analysis; and, ○ if the concept study leads to a feasibility study on the use of alternative energy to offset a portion of the Jay Project’s energy needs, report on the results, including the methods and analysis. <p>During its community visits, Dominion will engage on its greenhouse gas emissions management, and report on how results of past engagement have been incorporated into Dominion’s management of greenhouse gas emissions.</p>				
EA Measures Follow-up	13-4: Annual reporting from government and regulatory authorities	<p>In order to evaluate the effectiveness of mitigation measures for the protection of the environment, each regulatory authority or government that is wholly or partly responsible for implementation of any measure in this Report of EA will prepare an annual Report on Implementation of Jay Project Measures. The Report will:</p> <ul style="list-style-type: none"> a) describe the actions being undertaken to implement the EA measures or the part(s) of the EA measure for which the regulatory authority or government is responsible; and b) explain how the implementation actions, including any actions implemented through adaptive management, fulfill the intent of the EA measures, including consideration of the following questions: <ul style="list-style-type: none"> i. How are implementation actions addressing a likely significant adverse impact on the environment? ii. How effective are implementation actions at reducing, controlling, or eliminating the impact or its likelihood? iii. If the measure is for monitoring or research, are the implementation actions clearly linked to mitigation and/or operations? 	GNWT, WLWB	The GNWT will provide an annual Report on Implementation of Jay Project Measures directed to the GNWT to MVEIRB by July 1 of each year.	The GNWT will provide an annual Report on Implementation of Jay Project Measures directed to the GNWT to MVEIRB by July 1 of each year.	The GNWT will provide an annual Report on Implementation of Jay Project Measures directed to the GNWT to MVEIRB by July 1 of each year.
