Timber Harvesting Application
Approved Measures**

Measure No. 1 (no modification)

That two - 5,000m³ Timber Cutting Permits be granted.

Measure No. 2 (as modified):

RWED will undertake an interim timber supply analysis for the area between the Big Buffalo and Little Buffalo rivers, south of Great Slave Lake. This analysis is to be completed by November 2002. A complete timber supply analysis will be completed for the area in 2008. Applications for either timber cutting permits or licences for commercial purposes in this area, received before the completion of the interim timber supply analysis, will be subject to section 5(1)(d) of the Northwest Territories Forest Management Regulations.
