Subject: RE: Reminder - GeoNorth summary notes

Glenda - I have only a few comments....In general, the summary notes are good and seem to catch the essence of the sessions.

Day 2: page 12, top of page: **change** "There could be other scenarios but I'm not willing to present them now." to "There could be other scenarios that we need to address."

Day 3: page 6, top of page: **change** "Likely resolved" to "Unresolved."

Day 3: page 13, first Dogrib bullet: **change** "why?" to "why not?"

Day 3: page 13, third Dogrib bullet: **change** "pollution" to "dilution"

In addition to the GeoNorth summary notes, will a transcript of the sessions also be available?

Thanks for the opportunity to review and comment.

Glenda - thanks for the note - I did not see it until now (16:49 PST), however. If I get a chance this weekend, I will read through it, and let you know if I see anything outstanding (I didn't know we had a chance to comment) - just in case you haven't finished the final by Monday AM. Cheers

Subject: Reminder - GeoNorth
summary notes

This is a reminder that we would like to receive comments on GeoNorth's summary notes of the Snap Lake Technical Sessions by today (January 24). Once all comments have been integrated by GeoNorth, we will circulate the final draft to all of you before putting it on the public registry.

Thanks,
Glenda
