Louie,
I raised this point before and I believe it has been addressed by De Beers but just to make sure. DeBeers committed to 100% over capacity for treatment not 50% as stated in the day two notes
Thanks
Mark

from day two

<ul style="list-style-type: none"> ▪ Capacity of waste management pond is small relative to surface spring inflows, wondering what prepared to do to ensure can deal with the flows? 	<ul style="list-style-type: none"> ▪ Install 50% overcapacity in treatment plant over the years. Will always have this 50% overcap. Intend to increase capacity as the mine water flows increase. If flows are higher, will ensure capacity increases before reaching this level.

Lisa Best of GeoNorth is preparing the De Beers Technical Session notes and statement of commitments. I am distributing her notes as I receive them. As promised, participants to the technical sessions have the opportunity of providing any amendments to the notes before they are posted onto the public registry. Please email me suggested changes and I will forward them to Lisa.

Regards,
Luciano Azzolini

Louie,

The only amendment that I found was to the issue listed below. In my notes I recorded that De Beers committed to having double the treatment capacity available than is predicted to be required. That is %100 overcapacity rather than %50 as shown.

<ul style="list-style-type: none"> ▪ Capacity of waste management pond is small relative to surface spring inflows, wondering what prepared to do to ensure can deal with the flows? 	<ul style="list-style-type: none"> ▪ Install 50% overcapacity in treatment plant over the years. Will always have this 50% overcap. Intend to increase capacity as the mine water flows increase. If flows are higher, will ensure capacity increases before reaching this level.
