Facsimile (403) 262-7994

Dear Mr. Hong:

Paramount Transmission Ltd. (PTL), Cameron Hills Pipeline - Submission of a seed mixture and programs for re-vegetation, permafrost, and wildlife monitoring, pursuant to conditions 8, 13, and 18 of Order XO-P097-02-2002 (the Order)

The National Energy Board (the Board) has examined PTL's submissions in respect of the seed mixture and above-noted monitoring programs for the Cameron Hills Pipeline project. The Board acknowledges receipt of information in respect of the permafrost monitoring program submitted in partial fulfilment of condition 18 of the Order. In addition, the Board approves PTL's proposed seed mixture and re-vegetation monitoring program submitted pursuant to condition 8 of the Order and PTL's proposed wildlife monitoring program submitted pursuant to condition 13.

The Board expects the proposed monitoring programs will be continued for five years as described in the evidence submitted to date. PTL is reminded that any proposed changes to the approved monitoring programs would require further approval of the Board.

Yours truly,

Michel L. Mantha
Secretary
