**Subject:** Re: Draft Terms of Reference and Work Plan for Northrock Summit Creek EA

Hello Martin,

Below are my comments on the draft work plan:

Under Development Description:

I think cumulative effects should be added to section C.

Under Effects of the Environment:

I think cumulative effects should also be added to section D.

Under Access Road:

The potential effects should not be limited to "wildlife disturbance", but rather more general overall impacts of the access road.

Sincerely,

Jennifer Morin  
Conservation Coordinator  
CPAWS-NWT

Subject: Draft Terms of Reference and Work Plan for Northrock Summit Creek EA

Good Afternoon,

Please find attached draft Terms of Reference and Work Plan for the Environmental Assessment of Northrock's Summit Creek B-44 exploration well near Tulita. Please submit your comments by April 16, 2003.

If you have any questions or require further information, please do not hesitate to contact me.

Regards  
Martin

**Subject:** Northrock Summit Creek B-44 Exploratory Well EA TOR

Martin:

We have reviewed the draft TOR and have no comments regarding content.

It's likely that the proponent will need to undertake fieldwork in order to assess the potential of impact to archaeological and cultural resources. This work will have to be completed in summer, for obvious reasons, and will require the services of a professional archaeologist holding a valid NWT Archaeologists Permit. Given the review period for all NWT Archaeologists Permit applications (45 days) I recommend that, should they intend on conducting field research this summer, the proponent submit their permit to us as soon as possible.

Permit applications and information regarding archaeological site management in the NWT can be found on our website at <http://pwnhc.ca/programs/archa.htm>.
