Martin,

Thanks for the information. My fax is 514-8341.

I understand the EA process is fairly lengthy and could jeopardize the project. Our Exploration Licence 397 expires July 31, 2004, so there is only one remaining operating season available to us. In order for us to stage equipment in late August or early September, we need to go to bid at the latest in June to give 4 weeks for the bids to be open, a week for evaluation and award, and several weeks to get the equipment and fuel together and on site. Your advice on how we can compress this time frame would be appreciated.

I understand that Gordon Yakeleya was not prepared to have this application sent for EA, notwithstanding he has been a consistent objector. Is it possible for him to retract his objections, and either eliminate or shorten the EA process. I believe he has or is writing a letter to that effect to the SLWB.

Regards,

Matt

Hi Matt,

Please see the attachment for some information on the Summit Creek project. Could you give me your fax number to make sure I send everything to the right place.
