RE: MV2003C0003 Land Use Permit Application
Consolidated Goldwin Ventures Inc.

Dear Ms. Sian,

With respect to our phone conversation to day. I would like to suggest that the ToR, Cumulative effects section, "L," be expanded to contain the three basic premises be considered of cumulative effects developed by the Canadian Environmental Assessment Agency (CEAA 1999) and accepted by the MVEIRB in the consideration of these effects in Commander's exploration project located on Victoria Island NWT.

These are:

- There must be an environmental, biophysical, social or cultural impact related to the project.
- The effect must be demonstrated to operate cumulatively, additively or synergistically with impacts from other projects or activities.
- The other projects or activities exist or are likely to be carried out and are not hypothetical.

Since these have already been established and are fundamentally sound we would be more than willing to apply them to our specific project alone.

Although my stated intent to have the Cons. Goldwin Project proceed on its own appears to be being shuffled aside and we have not had any phone conference meeting with respects to my concerns about time and my ability to get this CE done without "growing it to mammoth" proportions. Please advise accordingly that my timing concerns are being considered!

Next week is a sort of a hodge podge because of the holidays but I will have my cell and should be on email for the most part.

Sincerely

"Laurence Stephenson"

Laurence Stephenson
