Subject: Clarification

Hi Laurie,

I distributed your correspondence re: the error on the description of the proposed development, namely that it is an exploration rather than advanced exploration.

Your correspondence has prompted questions regarding the scope of the proposed development. Your letter indicates that "we can commence drilling on the area around the Hearne Channel with helicopter support immediately". Your land use application had indicated that this would be a winter program. Is this still the case?

Also, I have received questions regarding the number of drill holes. The land use application states that drilling will occur in 3 areas. The land use application indicates five short holes and this is supported by your submission of the Exploration Program description (May 13, 2003) that states the "exploration project proposes to drill up to two diamond drill core holes on each of three areas identified". Could you confirm the number of holes per area?

Thanks.

Sincerely,  
Sherry
