Hi Kenneth,

Thank you for your note.

I had inquired about leases in Drybones/Wool Bay upon the referral of all projects to EA in the Drybones/Wool Bay areas and was informed that there were none.

Through review of screening documents, I did become aware of Mr. Robertson's cabin. In addition to the announcement in the newspaper, I contacted him via e-mail (as noted in the screening file) to advise him of this EA. I received an auto-reply indicating he would be away for an extended period of time. Do you know how I might reach him?

Besides Mr. Greg Robertson and Ms. Susan Weaver, was there anyone else I should contact?

Sherry

Subject: Drybones Bay EA

Hi Sherry,

I have seen much of the documentation resulting from the review of various drill projects in the Drybones Bay area and was wondering if the person who holds a land lease with DIAND was included in the process. His name is Greg Robertson and the lease reference number with our Land Administration office is 85I/4-1. He has a cabin on the south shore of Drybones Bay. I was wondering if you were aware of this.
