Lionel:

Please see attached for a correction that needs to be made to the response letter we just sent in. Thanx.

Regards
Mike B.

INAC response to MVEIRB IR's on Snowfield Development Corp.

CORRECTION REQUIRED

To: MVEIRB IR # 1.1.15 - request (b.)

The words and letters marked in red were inadvertently omitted from the original response, which needs to be revised and resubmitted.

A staker is not required to seek permission from INAC prior to staking a claim, nor is a land use permit required (see Subsection 2(2)(c) of the Land Use Regulations). After field staking is completed, the staker or holder has 60 days in which to submit an application, with sketch to the Mining Recorder. The Mining Recorder must record a claim if the staking, application and sketch are in compliance with the Canada Mining Regulations, which do not require consultation prior to recording. It is up to the staker, or the person hiring a staker, to ensure that the ground is available under Section 11 of the CMRs. INAC encourages all parties to review both the mining and surface maps prior to staking, and to draw on local knowledge where feasible.
