Hi Jennifer,

These developments were referred due to public concern about cumulative effects. I will add you to the distribution list for all of them.

Attached is the public registry index for these EAs. The web site has additional digital information that will be useful. This should help you to catch up on materials already submitted.

Sherry

Hi Sherry,

Basically, CPAWS' concerns surround cumulative effects. Were all 4 referred because of this? If so, please keep us on the distribution list and if at all possible, our preference is to have information emailed as opposed to being faxed.

Thank you!

-Jennifer

Hi Jen,

Thanks for your response. For clarity, there are 4 exploration programs in the Drybones Bay/Wool Bay area. Would you like to be on the distribution for all, only those in Drybones Bay, or only the Snowfield project?

Sherry

Hi Sherry,

Please keep CPAWS-NWT on the distribution list.

Thanks,

Jennifer Morin
