Attention: Ernest Watson
Area Habitat Biologist

Dear Mr. Watson:

Reply to Information Request IR0405-002-2 Response in Connection with Environmental Assessment: LUP MV2004C0030, MVEIRB File EA 0405-02

We refer to the response by Fisheries and Oceans Canada (DFO) to information request IR0405-002-2 dated August 24, 2005. This response contained a site visit report by DFO following an inspection of the Prairie Creek site on July 20, 2005, in connection with Canadian Zinc Corporation's (CZN) proposed Phase 3 drilling program.

The DFO report contained specific advice to CZN on what actions are or are not to be taken to prevent a potential harmful alteration, disruption or destruction (HADD) of fish habitat. CZN is pleased to confirm that it intends to follow the advice provided without exception.

If you have any questions, please contact us at 604-688-2001

Yours truly,
CANADIAN ZINC CORPORATION

David P. Harpley, P. Geo.
Environmental Coordinator
