

Mackenzie Valley Environmental Impact Review Board

July 23, 2004

To: Fortune Minerals Environmental Assessment Distribution List

Hello All,

Attached is the Review Board's draft *Terms of Reference and Workplan for the Fortune Minerals Meridian Lake Mineral Exploration Program*.

Please review it carefully. It is a draft document describing the questions the Review Board requires Fortune Minerals to answer for the Environmental Assessment. It also provides a draft schedule (on page 15) for different stages in the Environmental Assessment.

Note that this schedule gives parties, such as involved communities, 10 working days to review the Developer's Assessment Report, 10 working days to propose Information requests to the Review Board, and 15 working days to produce parties' reports based on the answers received from Fortune Minerals Ltd. and others. If you wish to suggest a different length period for these or other steps in the process, it is better to do so now than later in the process.

If you have any comments (such as additional items or schedule suggestions), please notify the Review Board **by Monday August 16th, 2004**.

Thank you,

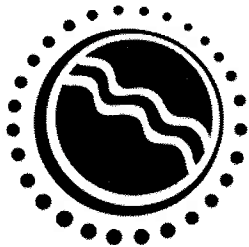

Alan Ehrlich.
Senior Environmental Assessment Officer
