Re: Suggested change in Timelines in Draft Workplan

The Mackenzie Valley Environmental Impact Review Board (Review Board) met on December 21, 2006 to consider the revised draft work plans for the above environmental assessments. The Review Board has determined it would be beneficial for staff to hold a pre-conference session that will also include a half-day workshop to further examine areas of important use and/or of cultural significance. **This full day session is planned for February 6, 2007.**

The Board has rescheduled its hearing for these proposed developments to **March 27, 2007**. After the hearing, the Board will announce when the public record will close, but it anticipates the public record will remain open for at least two weeks following the hearing. If you wish to provide comments regarding these changes, please submit them to the Review Board **by January 15, 2007**.

Sincerely,

A handwritten signature in black ink, appearing to read "Mary Tapsell". The signature is fluid and cursive, with a large loop at the top.

Mary Tapsell
Manager, EIA
