**Re: Clarification – LKDFN Response to Information Request  
IR0607-003-04: Special Values of Project Area**

It has been pointed out to me that I have now officially and completely lost my mind, and I wish to offer the following clarification in regards to the LKDFN response to information requests which I prepared and submitted last month.

On page 1, I stated that *"the project area is clearly within Parks Canada's area of interest for the national park"*. I'm not quite sure what I was thinking there (obviously I wasn't thinking at all), as clearly it is not. Parks Canada's preliminary area of interest is much to the west of Screech Lake. However, that being said, the rest of the IR response is correct, in particular the fact that Screech Lake is clearly within an area that the LKDFN has identified for conservation purposes and is a part of one of the proposed Special Management Areas under the Thelon Game Sanctuary Management Plan.

I take full responsibility for this major error, likely the product of finishing our response on the last day of work before holidays (too many projects, too few brain cells left!), and sincerely apologize for any misunderstandings this may have caused. If you require further clarification, please let me know.

Marsi cho!
