ACKNOWLEDGEMENTS

EXECUTIVE SUMMARY

TABLE OF CONCORDANCE

1. INTRODUCTION	1.1
1.1 The Taltson Expansion Project	1.1
1.1.1 Project Development Background.....	1.1
1.1.2 Expansion Project Overview	1.2
1.1.3 Project Rationale	1.8
1.1.4 Taltson Expansion Project as a Sustainable Development.....	1.9
1.2 Developer's Assessment Report - Document Overview	1.9
2. REGULATORY PROCESS.....	2.1
2.1 Impact Assessment Process	2.1
2.1.1 Mackenzie Valley Resource Management Act.....	2.1
2.1.2 Taltson Expansion Project and Impact Assessment Process	2.3
2.2 Permits and Licences.....	2.4
2.2.1 Anticipated Permits and Licences	2.4
2.2.2 Key Construction and Operations Permits and Licences	2.6
2.2.2.1 LAND TENURE	2.6
2.2.2.2 MVLWB WATER USE LICENCE	2.7
2.2.2.3 DFO FISHERIES ACT AUTHORIZATION	2.7
2.2.2.4 TRANSPORT CANADA NAVIGABLE WATERS APPROVAL	2.7
3. DEVELOPER	3.1
3.1 Introduction	3.1
3.2 Ownership Group	3.1
3.2.1 Akaitcho Energy Corporation (AEC).....	3.1
3.2.2 Métis Energy Company Ltd. (MEC).....	3.1

3.2.3	NWT Energy Corporation (03) Ltd. (NTEC 03)	3.2
3.2.4	Dezé Energy Corporation Ltd. — Business Structure	3.2
3.3	Obligatory and Voluntary Reporting	3.3
3.3.1	Obligatory Reporting	3.3
3.3.2	Voluntary Reporting	3.3
3.4	Dezé Project Procurement Policy	3.4
3.5	Dezé Environmental Management Plan	3.5
4.	COMMUNITY ENGAGEMENT	4.1
4.1	Partnership Consultation and Formation	4.1
4.2	Community Consultation	4.1
4.2.1	Project Design Considerations of Public Importance	4.3
4.2.1.1	PROJECT CAPACITY	4.3
4.2.1.2	COMMITMENT OF MINES TO PURCHASE EXPANSION PROJECT POWER	4.4
4.2.1.3	OTHER POTENTIAL BENEFICIARIES OF THE PROJECT POWER AND INFRASTRUCTURE	4.4
4.2.2	Discussion – Community Consultations	4.6
4.3	Regulatory Consultations	4.7
4.3.1	Discussion – Regulatory Consultations	4.8
4.4	Summary	4.12
5.	PURPOSE AND RATIONALE	5.1
5.1	General History of Expansion Project Concept	5.1
5.2	Project Purpose	5.1
5.3	Project Rationale	5.2
5.3.1	Environmental Benefits, Energy Planning, and Sustainability	5.2
5.3.1.1	MAJOR REDUCTION IN DIESEL CONSUMPTION AND GREENHOUSE GAS EMISSIONS	5.2
5.3.1.2	SUPPORT OF THE NWT ENERGY STRATEGY	5.3
5.3.1.3	LIMITED ENVIRONMENTAL FOOTPRINT	5.4
5.3.1.4	INCREASED WINTER ROAD LONGEVITY AND REDUCED IMPACTS	5.4
5.3.1.5	REDUCTION IN FLOW AND EROSION DAMAGE ON TRUDEL CREEK	5.4
5.3.1.6	OPTIMIZED RESOURCE UTILIZATION	5.5
5.3.1.7	SUSTAINABILITY	5.5
5.3.2	Social Benefits	5.5
5.3.2.1	OWNERSHIP	5.5
5.3.2.2	SOCIO-ECONOMIC BENEFITS	5.5
5.3.3	Economic Benefits	5.6

5.3.3.1	LIFE EXTENSION OF EXISTING TWIN GORGES POWER STATION	5.6
5.3.3.2	EXISTING MINE LIFE	5.6
5.3.3.3	NEW CUSTOMERS	5.6
5.3.3.4	LOCAL AND REGIONAL ECONOMICS	5.7
5.4	Technical Feasibility	5.7
5.4.1	Infrastructure Design and Operation	5.7
5.4.2	Site Conditions	5.7
5.4.3	Hydrology	5.8
5.4.4	Construction	5.8
5.4.5	Supply and Demand Balance	5.8
5.4.6	Conclusions	5.10
5.5	Economic Feasibility	5.11
6.	DEVELOPMENT DESCRIPTION	6.1.1
6.1	Taltson River Basin & Existing Twin Gorges Power Development	6.1.1
6.1.1	Development Location	6.1.1
6.1.2	Development History	6.1.3
6.1.3	Current Basin Characteristics	6.1.8
6.1.3.1	TALTSON UPPER MAINSTEM AND NONACHO LAKE SYSTEM	6.1.11
6.1.3.2	TRONKA CHUA GAP TO LADY GREY LAKE	6.1.11
6.1.3.3	TALTSON RIVER BELOW NONACHO LAKE	6.1.11
6.1.3.4	TAZIN RIVER SYSTEM	6.1.12
6.1.3.5	TALTSON RIVER LOWER REACHES	6.1.13
6.1.3.6	TRUDEL CREEK	6.1.13
6.1.4	Existing Power Facility	6.1.13
6.1.4.1	GENERAL	6.1.14
6.1.4.2	ACCESS TO THE TALTSON TWIN GORGES SITE	6.1.14
6.1.4.3	TALTSON TWIN GORGES GENERATING STATION	6.1.14
6.1.4.4	SOUTH VALLEY SPILLWAY	6.1.17
6.1.4.5	NONACHO LAKE STRUCTURE AND TRONKA CHUA GAP	6.1.20
6.1.4.6	TALTSON TWIN GORGES TRANSMISSION LINE INFRASTRUCTURE	6.1.23
6.1.4.7	ALTERATIONS AT TWIN GORGES SINCE ORIGINAL CONSTRUCTION	6.1.26
6.1.4.8	CONDITION ASSESSMENT OF EXISTING FACILITY	6.1.27
6.1.4.9	TALTSON TWIN GORGES CURRENT OPERATION	6.1.29
6.2	Project Design Evolution – Generation and Lake Control Facilities	6.2.1
6.2.1	General Approach	6.2.1
6.2.2	Taltson Watershed Hydrological Database	6.2.1
6.2.3	Concept Level Design	6.2.6
6.2.4	Generation Model	6.2.7
6.2.5	Site Capacity Assessment and Plant Sizing	6.2.8
6.2.6	Taltson River Basin Model	6.2.8

6.3	Project Design Evolution – Transmission and Substation Facilities	6.3.1
6.3.1	General Approach	6.3.1
6.4	Project Description – Preferred Expansion Project Concept	6.4.1
6.4.1	Generation Facility – North Gorge Site	6.4.1
6.4.2	Nonacho Lake Control Structures	6.4.6
6.4.3	South Valley Spillway and Minimum Flow Release Structure.....	6.4.10
6.4.4	South Gorge By-pass Spillway	6.4.12
6.4.5	Main Switchyard at Twin Gorges	6.4.15
6.4.6	New Transmission Line	6.4.15
	6.4.6.1 GENERAL CHARACTERISTICS	6.4.15
	6.4.6.2 TRANSMISSION LINE SECTOR ROUTING DESCRIPTION.....	6.4.19
6.4.7	Substations	6.4.23
6.4.8	Existing Plant Life Extension	6.4.23
6.5	Construction	6.5.1
6.5.1	Limitations of Description	6.5.1
6.5.2	Site Access for Construction	6.5.1
	6.5.2.1 GENERAL APPROACHES	6.5.1
	6.5.2.2 CONSTRUCTION ACCESS FOR TWIN GORGES SITE.....	6.5.4
	6.5.2.3 CONSTRUCTION ACCESS FOR SOUTHERN SECTOR TRANSMISSION LINE AND NONACHO LAKE CONTROL STRUCTURE.....	6.5.6
	6.5.2.4 CONSTRUCTION ACCESS FOR EAST GREAT SLAVE LAKE SECTOR OF TRANSMISSION LINE	6.5.12
	6.5.2.5 CONSTRUCTION ACCESS FOR NORTHERN SECTOR OF TRANSMISSION LINE	6.5.14
	6.5.2.6 CONSTRUCTION ACCESS FOR GAHCHO KUÉ TO SNAP LAKE SECTOR OF TRANSMISSION LINE	6.5.16
	6.5.2.7 CONSTRUCTION ACCESS FOR EKATI TO DIAVIK SECTOR OF TRANSMISSION LINE	6.5.16
	6.5.2.8 INTERIM AND LONG-TERM ACCESS MANAGEMENT OF WINTER ROADS	6.5.16
6.5.3	Construction Accommodations	6.5.16
	6.5.3.1 GENERAL REQUIREMENTS.....	6.5.16
	6.5.3.2 LARGE CAMP DESCRIPTION	6.5.17
	6.5.3.3 SMALL CAMP DESCRIPTION.....	6.5.21
6.5.4	Construction Methodology.....	6.5.24
	6.5.4.1 GENERAL CAVEAT	6.5.24
	6.5.4.2 DESIGN DEVELOPMENT	6.5.24
	6.5.4.3 SITE PREPARATION AND MATERIALS DELIVERY	6.5.24
	6.5.4.4 HAZARDOUS MATERIALS.....	6.5.27
	6.5.4.5 GENERAL EQUIPMENT LIST	6.5.30
	6.5.4.6 TWIN GORGES FACILITY CONSTRUCTION	6.5.32
	6.5.4.7 NONACHO LAKE CONTROL STRUCTURE CONSTRUCTION	6.5.36
	6.5.4.8 TRANSMISSION LINE CONSTRUCTION	6.5.40
6.5.5	In-stream Works	6.5.44
	6.5.5.1 GENERAL	6.5.44
	6.5.5.2 WATER BODY CROSSINGS OF WINTER ROAD CORRIDOR AND TRANSMISSION LINE	6.5.45

6.5.5.3	REPAIR OF NONACHO LAKE DAM	6.5.45
6.5.5.4	EXCAVATION FOR NEW NONACHO LAKE CONTROL STRUCTURE CHANNEL	6.5.47
6.5.5.5	NONACHO LAKE SPILLWAY RAISE	6.5.47
6.5.5.6	TWIN GORGES NORTH GORGE CANAL AND TAILRACE ROCK PLUGS	6.5.47
6.5.5.7	SOUTH GORGE BY-PASS FACILITY.....	6.5.48
6.5.5.8	MINIMUM RELEASE FACILITY AT THE SOUTH VALLEY SPILLWAY	6.5.48
6.5.6	Project Development Schedule.....	6.5.48
6.5.7	Project Employment Opportunities During Construction	6.5.51
6.5.7.1	CONTRACTING APPROACH	6.5.51
6.5.7.2	DIRECT EMPLOYMENT ESTIMATES	6.5.51
6.5.7.3	INDIRECT EMPLOYMENT OPPORTUNITIES.....	6.5.54
6.6	Project Operations	6.6.1
6.6.1	General Approach	6.6.1
6.6.2	Staffing	6.6.1
6.6.3	Inspection and Maintenance	6.6.2
6.6.4	Ongoing Operational Modeling and Field Programs	6.6.2
6.6.5	Nonacho Lake Control	6.6.3
6.6.5.1	NORMAL OPERATIONS	6.6.3
6.6.5.2	SCHEDULED MAINTENANCE AND SHUTDOWNS.....	6.6.4
6.6.5.3	UNSCHEDULED SHUTDOWNS	6.6.4
6.6.6	Twin Gorges Operations.....	6.6.5
6.6.6.1	NORMAL OPERATIONS	6.6.5
6.6.7	Plant Outages	6.6.6
6.6.7.1	SCHEDULED OUTAGES AND NORMAL SHUTDOWNS.....	6.6.6
6.6.7.2	UNSCHEDULED OUTAGES AND EMERGENCY SHUTDOWNS.....	6.6.7
6.6.7.3	FLOW RAMPING IN TRUDEL CREEK AND DOWNSTREAM OF PLANTS.....	6.6.8
6.6.7.4	FLOW RAMPING IN TALTSON RIVER BELOW NONACHO LAKE	6.6.15
6.6.8	Reduced Output Operations – Interim Loss of Customer Load	6.6.16
6.7	Project Performance	6.7.1
6.7.1	Energy Generation and Power Output Reliability	6.7.1
6.7.1.1	GENERAL APPROACH	6.7.1
6.7.1.2	PERIOD OF RECORD ENERGY OUTPUT AND CAPACITY FACTOR.....	6.7.3
6.7.1.3	FIRM POWER AND CAPACITY DELIVERY BANDS.....	6.7.7
6.7.2	Outages, System Losses and Net Delivery.....	6.7.7
6.7.2.1	GENERAL	6.7.7
6.7.2.2	SCHEDULED OUTAGES.....	6.7.7
6.7.2.3	UNSCHEDULED OUTAGES.....	6.7.8
6.7.2.4	TRANSMISSION LINE LOSSES.....	6.7.9
6.7.2.5	SUPPLY AND DEMAND SUMMARY.....	6.7.10
6.8	Project Closure.....	6.8.1
6.8.1	General	6.8.1
6.8.2	Applicable Policies, Regulations & Industry Standards.....	6.8.2

6.8.2.1	REGULATIONS	6.8.2
6.8.2.2	POLICIES	6.8.3
6.8.2.3	INDUSTRY STANDARDS	6.8.3
6.8.2.4	GUIDELINES.....	6.8.3
6.8.2.5	TIMELINES.....	6.8.4
6.8.3	Closure and Restoration Goals and General Processes	6.8.4
6.8.3.1	GENERAL	6.8.4
6.8.3.2	RESTORATION PLAN GOALS.....	6.8.4
6.8.3.3	BIOTIC INTERVENTIONS	6.8.5
6.8.3.4	LANDSCAPE RESTRICTIONS.....	6.8.5
6.8.3.5	RESTORATION FUNDING AND RESOURCING	6.8.5
6.8.3.6	DURATION OF RESTORATION ACTIVITIES.....	6.8.6
6.8.4	Closure and Restoration of Short-Term Project Components.....	6.8.6
6.8.4.1	WINTER ROADS	6.8.6
6.8.4.2	CONSTRUCTION CAMPS	6.8.6
6.8.4.3	SEWAGE LAGOONS (IF UTILIZED)	6.8.7
6.8.4.4	STAGING AREAS AND STORAGE FACILITIES	6.8.7
6.8.4.5	SHORT-TERM PROJECT COMPONENT RESTORATION ALTERNATIVES	6.8.8
6.8.5	Closure and Restoration of Medium-Term Project Components.....	6.8.8
6.8.5.1	GENERAL	6.8.8
6.8.5.2	TRANSMISSION LINES.....	6.8.8
6.8.5.3	SUBSTATIONS.....	6.8.9
6.8.5.4	MEDIUM-TERM PROJECT COMPONENTS ALTERNATIVES AND COSTS.....	6.8.9
6.8.6	Closure and Restoration of Long-Term Components.....	6.8.9
6.8.6.1	GENERAL	6.8.9
6.8.6.2	CLOSURE OF GENERATING STATION AND INFRASTRUCTURE	6.8.10
6.8.6.3	LONG-TERM PROJECT COMPONENTS ALTERNATIVES AND COSTS.....	6.8.11
6.9	Human Resources	6.9.1
6.10	Design and Operational Mitigation	6.10.1
6.10.1	General	6.10.1
6.10.2	Design Mitigation Features	6.10.1
6.10.3	Construction Mitigation Measures.....	6.10.3
6.10.4	Operating Basis Mitigation Measures	6.10.4
7.	ENVIRONMENTAL MANAGEMENT SYSTEM	7.1
7.1	Introduction	7.1
7.2	Materials and Waste Management	7.1
7.3	Erosion and Sediment Control Management	7.1
7.4	Vegetation Management	7.2

7.5	Human-Wildlife Conflict Management	7.2
7.6	Spill Contingency and Response Plan	7.3
8.	ALTERNATIVES	8.1.1
8.1	Background	8.1.1
8.2	Plant Siting and Layout.....	8.2.1
8.3	Plant Sizing	8.3.1
8.3.1	General Methodology.....	8.3.1
8.3.2	Site Capacity and Energy Output.....	8.3.1
8.3.3	Hydrologic Trends.....	8.3.2
8.3.4	Incremental Benefit/Cost Assessment.....	8.3.5
8.3.5	Customer Load Forecast and Contract Opportunities	8.3.6
8.3.6	Hydrological Effects of Plant Sizing	8.3.6
8.3.7	Other Environmental and Social Effects.....	8.3.7
8.3.8	Resource Optimization	8.3.7
8.3.9	Conclusions on Plant Sizing	8.3.7
8.4	Transmission Line Routing Alternatives	8.4.1
8.4.1	Routing Alternatives Description.....	8.4.1
8.4.1.1	WEST ARM ROUTE	8.4.4
8.4.1.2	SUBMARINE ROUTE	8.4.7
8.4.1.3	SIMPSON ISLAND CROSSING ROUTE	8.4.9
8.4.1.4	EAST ARM ROUTE	8.4.14
8.4.1.5	SUMMARY OF LINE ROUTE CHARACTERISTICS.....	8.4.17
8.4.2	Assessment Methodology	8.4.20
8.4.2.1	ASSESSMENT STRUCTURE	8.4.20
8.4.2.2	CRITERIA SCREENING	8.4.22
8.4.2.3	CRITERIA RANKING.....	8.4.28
8.4.2.4	FINAL SELECTION OF THE PREFERRED OPTIONS	8.4.28
8.4.3	Environmental Assessment of Transmission Line Routes	8.4.28
8.4.4	Socio-Economic Assessment of Transmission Line Routes.....	8.4.30
8.4.5	Land Access Assessment of Transmission Line Routes.....	8.4.33
8.4.6	Engineering/Cost Assessment of Transmission Line Routes	8.4.35
8.4.7	Construction and Operations Risk Assessment of Transmission Line Routes.....	8.4.37
8.4.8	Assessment Summary.....	8.4.39
9.	EXISTING ENVIRONMENT	9.1.1
9.1	Location	9.1.1
9.2	Areas of Special Sensitivity.....	9.2.1

9.2.1	Protected Areas: Territorial Parks	9.2.1
9.2.1.1	QUEEN ELIZABETH TERRITORIAL PARK.....	9.2.1
9.2.1.2	LITTLE BUFFALO RIVER FALLS TERRITORIAL PARK	9.2.1
9.2.1.3	FORT SMITH MISSION TERRITORIAL PARK.....	9.2.3
9.2.1.4	SALT MOUNTAIN TERRITORIAL PARK.....	9.2.3
9.2.2	Protected Areas: National Parks.....	9.2.3
9.2.2.1	WOOD BUFFALO NATIONAL PARK	9.2.3
9.2.3	Proposed Protected Areas	9.2.3
9.2.3.1	PROPOSED EAST ARM NATIONAL PARK.....	9.2.3
9.2.4	Potential Protected Areas.....	9.2.6
9.2.4.1	AKAITCHO PROCESS AND INTERIM LAND WITHDRAWAL	9.2.6
9.2.5	Other Ecologically Important Areas	9.2.6
9.2.5.1	INTERNATIONAL BIOLOGICAL PROGRAM	9.2.6
9.3	Taltson Basin Hydrology	9.3.1
9.3.1	Taltson Basin Description	9.3.1
9.3.2	Summary of Historic Hydrometric Data	9.3.4
9.3.2.1	ANNUAL RUNOFF.....	9.3.5
9.3.2.2	MONTHLY RUNOFF DISTRIBUTION.....	9.3.8
9.3.2.3	PEAK FLOWS.....	9.3.11
9.3.3	Taltson Basin Flow Model	9.3.14
9.3.3.1	GENERAL MODEL DESCRIPTION AND METHODOLOGY	9.3.14
9.3.3.2	MODEL CALIBRATION.....	9.3.24
9.3.3.3	MODELLED HISTORIC AND BASELINE SCENARIOS.....	9.3.24
9.3.3.4	MODEL UNCERTAINTIES	9.3.52
9.4	Physical Environment.....	9.4.1
9.4.1	Bedrock, Subsurface, and Soil Characteristics.....	9.4.1
9.4.1.1	BEDROCK.....	9.4.1
9.4.1.2	SURFICIAL MATERIALS AND LANDFORMS	9.4.2
9.4.1.3	ROUTE-SPECIFIC TERRAIN	9.4.3
9.4.1.4	SOILS.....	9.4.5
9.4.2	Areas of Potential Instability	9.4.9
9.4.2.1	GEOLOGICAL STABILITY AND SEISMICITY	9.4.9
9.4.2.2	PERMAFROST	9.4.9
9.4.2.3	ACID ROCK DRAINAGE.....	9.4.12
9.4.3	Climate	9.4.13
9.4.3.1	DATA SOURCES.....	9.4.13
9.4.4	Air Quality	9.4.18
9.4.5	Noise.....	9.4.19
9.4.6	Water Quality	9.4.20
9.4.6.1	TALTSON RIVER (EXCLUDING TRUDEL CREEK).....	9.4.20
9.4.6.2	TRUDEL CREEK	9.4.21
9.5	Biological Environment	9.5.1

9.5.1	Fish and Aquatic Life Forms	9.5.1
9.5.1.1	FISH.....	9.5.1
9.5.2	Taltson and Trudel Wetlands	9.5.7
9.5.2.1	TALTSON RIVER (EXCLUDING TRUDEL CREEK).....	9.5.8
9.5.2.2	TRUDEL CREEK	9.5.8
9.5.3	Birds and Bird Habitat	9.5.9
9.5.3.1	INTRODUCTION	9.5.9
9.5.3.2	PASSERINES.....	9.5.9
9.5.3.3	WATERFOWL	9.5.15
9.5.3.4	RAPTORS	9.5.22
9.5.4	Caribou.....	9.5.28
9.5.4.1	INTRODUCTION	9.5.28
9.5.4.2	IMPORTANCE OF CARIBOU.....	9.5.29
9.5.4.3	EXISTING INFORMATION.....	9.5.34
9.5.4.4	BASELINE STUDIES.....	9.5.51
9.5.4.5	EFFECTS OF DISTURBANCE	9.5.60
9.5.5	Key Mammals	9.5.69
9.5.5.1	INTRODUCTION	9.5.69
9.5.5.2	MUSKOXEN.....	9.5.69
9.5.5.3	MOOSE	9.5.71
9.5.5.4	MARTEN.....	9.5.76
9.5.5.5	LYNX.....	9.5.78
9.5.5.6	MUSKRAT.....	9.5.81
9.5.5.7	BEAVER	9.5.86
9.5.5.8	RIVER OTTER	9.5.91
9.5.5.9	MINK.....	9.5.92
9.5.6	Vegetation.....	9.5.94
9.5.6.1	INTRODUCTION	9.5.94
9.5.6.2	OLD GROWTH FORESTS.....	9.5.94
9.5.6.3	ECONOMIC IMPORTANCE	9.5.95
9.5.6.4	LOWLAND AREAS	9.5.95
9.5.6.5	TRADITIONAL PLANTS	9.5.96
9.5.6.6	LAND COVER UNITS WITHIN THE PROJECT FOOTPRINT	9.5.98
9.5.7	Vulnerable Species	9.5.102
9.5.7.1	DETERMINING SPECIES AT RISK FOR THE TALTSON PROJECT	9.5.102
9.5.7.2	RARE PLANTS	9.5.103
9.5.7.3	WILDLIFE SPECIES AT RISK.....	9.5.106
9.6	Human Environment	9.6.1
9.6.1	Traditional Knowledge.....	9.6.1
9.6.1.1	APPROACH.....	9.6.1
9.6.1.2	TRADITIONAL KNOWLEDGE IN THE PROJECT AND PARTNERSHIP FORMULATION PERIOD (2002 TO 2006)	9.6.1
9.6.1.3	TRADITIONAL KNOWLEDGE IN THE PROJECT DESIGN AND ASSESSMENT STAGE (2006 TO 2009).....	9.6.2

9.6.1.4	ABORIGINAL VALUES ABOUT THE ENVIRONMENT	9.6.2
9.6.1.5	ABORIGINAL KNOWLEDGE ABOUT THE USE AND MANAGEMENT OF THE ENVIRONMENT	9.6.4
9.6.1.6	ABORIGINAL KNOWLEDGE OF THE ENVIRONMENT	9.6.6
9.6.2	Legacy Issues	9.6.7
9.6.2.1	AREA EAST OF THE SLAVE RIVER BETWEEN GREAT SLAVE LAKE AND LAKE ATHABASCA	9.6.7
9.6.2.2	ROCHER RIVER.....	9.6.13
9.6.2.3	TAZIN RIVER DIVERSION.....	9.6.15
9.6.2.4	EXISTING TWIN GORGES GENERATING FACILITY.....	9.6.17
9.6.2.5	CONCLUSION	9.6.18
9.6.3	Communities and Regional Economics	9.6.19
9.6.4	Traditional Land and Resource Use	9.6.20
9.6.4.2	2008 HUMAN ACTIVITY SURVEY, NONACHO LAKE	9.6.42
9.6.5	Non-Traditional Land and Resource Use	9.6.42
9.6.5.1	OIL, GAS, MINING AND MINERAL EXPLORATION	9.6.42
9.6.5.2	TIMBER HARVESTING	9.6.43
9.6.5.3	ACCESS AND TRANSPORTATION	9.6.44
9.6.6	Hunting, Fishing and Tourism	9.6.50
9.6.6.1	HUNTING	9.6.50
9.6.6.2	FISHING.....	9.6.54
9.6.6.3	OTHER TOURISM.....	9.6.59
9.6.7	Heritage Resources.....	9.6.62
9.6.7.1	INTRODUCTION	9.6.62
9.6.7.2	ARCHAEOLOGICAL SETTING	9.6.63
9.6.7.3	HISTORIC SUMMARY	9.6.65
9.6.7.4	PREVIOUS ARCHAEOLOGICAL STUDIES.....	9.6.67
9.6.7.5	KNOWN HERITAGE RESOURCES	9.6.71
9.6.7.6	SITES OF TRADITIONAL / CULTURAL SIGNIFICANCE.....	9.6.80
9.6.7.7	GRAVE SITES	9.6.82
9.6.7.8	TRADITIONAL TRAVEL ROUTES AND PORTAGES	9.6.82
9.6.7.9	TRADITIONAL CABINS AND CAMP SITES	9.6.83
10.	ASSESSMENT METHODS AND PRESENTATION.....	10.1
10.1	Introduction	10.1
10.1.1	Approach Summary	10.2
10.2	Existing Environment.....	10.3
10.3	Valued Components.....	10.3
10.3.1	Valued Component Selection.....	10.4
10.3.2	Assessment Endpoints.....	10.4
10.4	Spatial and Temporal Boundaries.....	10.5

10.4.1	Spatial Boundaries	10.6
10.4.2	Temporal Boundaries	10.7
10.5	Project Components	10.8
10.6	Pathway Analysis	10.15
10.6.1	Identification of Pathways	10.15
10.6.2	Mitigation	10.15
10.6.3	Pathway Validation.....	10.16
10.7	Residual Effects Analysis.....	10.17
10.7.1	Incremental Effects	10.18
10.7.2	Cumulative Effects	10.19
10.7.2.1	PREVIOUS AND EXISTING DEVELOPMENTS	10.20
10.8	Residual Effects Classification	10.21
10.8.1	Criteria Definitions	10.21
10.8.2	Definitions of Scales for Criteria.....	10.23
10.8.3	Residual Effects Classification	10.25
10.9	Significance Determination	10.28
10.10	Uncertainty	10.30
10.10.1	Reasonably Foreseeable Projects	10.30
10.11	Monitoring	10.35
11	KEY LINES OF INQUIRY.....	11.1
11.1	Introduction	11.1
11.1.1	Barren-ground Caribou.....	11.1
11.1.2	Water Fluctuations in the Taltson River Watershed	11.2
11.1.3	Ecological Changes in Trudel Creek	11.2
12.	BARREN-GROUND CARIBOU	12.1.1
12.1	Introduction	12.1.1
12.1.1	Context	12.1.1
12.1.2	Content.....	12.1.2
12.1.3	Study Area	12.1.3
12.1.3.1	SPATIAL BOUNDARIES OF THE ASSESSMENT.....	12.1.3
12.1.3.2	TEMPORAL BOUNDARIES	12.1.7
12.1.4	Valued Components and Assessment Endpoints.....	12.1.7
12.2	Pathways Analysis	12.2.1
12.2.1	Mitigation	12.2.1
12.2.2	Pathway Validation.....	12.2.6

12.2.2.1	INVALID PATHWAYS	12.2.7
12.2.2.2	MINOR PATHWAYS.....	12.2.9
12.2.2.3	VALID PATHWAYS.....	12.2.11
12.3	Effects Assessment for Barren-Ground Caribou.....	12.3.1
12.3.1	General Approach	12.3.1
12.3.2	Project Footprint Leading to Habitat Loss and Fragmentation	12.3.3
12.3.2.1	METHODS.....	12.3.3
12.3.2.2	HABITAT LOSS RESULTS.....	12.3.7
12.3.2.3	HABITAT FRAGMENTATION RESULTS	12.3.11
12.3.3	Sensory Disturbance Leading to Changes in Habitat Quality, Movement and Behaviour.....	12.3.12
12.3.3.1	METHODS.....	12.3.13
12.3.3.2	RESULTS.....	12.3.23
12.3.3.3	SENSORY DISTURBANCE EFFECTS ON CARIBOU DISTRIBUTION AND MOVEMENT	12.3.25
12.3.4	Direct and Indirect Habitat Loss Leading to Change in Abundance	12.3.28
12.3.4.1	POPULATION VIABILITY ANALYSIS METHODS.....	12.3.28
12.3.4.2	POPULATION VIABILITY ANALYSIS RESULTS.....	12.3.33
12.3.5	Use of Linear Corridors by Wolves Leading to Change in Predation Rate.....	12.3.35
12.3.6	Effects to Harvesting Opportunities	12.3.37
12.3.6.1	ACCESS TO CARIBOU.....	12.3.37
12.3.6.2	AVAILABILITY OF CARIBOU.....	12.3.38
12.4	Residual Effects Summary	12.4.1
12.4.1.1	PROJECT FOOTPRINT LEADING TO HABITAT LOSS AND FRAGMENTATION	12.4.1
12.4.1.2	SENSORY DISTURBANCES LEADING TO A CHANGE IN HABITAT QUALITY, AND MOVEMENT AND BEHAVIOUR	12.4.2
12.4.1.3	DIRECT AND INDIRECT HABITAT LOSS LEADING TO CHANGE IN ABUNDANCE	12.4.3
12.4.1.4	USE OF LINEAR CORRIDORS BY WOLVES LEADING TO CHANGE IN PREDATION RATE	12.4.3
12.4.1.5	EFFECTS TO HARVESTING OPPORTUNITIES	12.4.3
12.5	Residual Effect Classification	12.5.1
12.5.1	Methods.....	12.5.1
12.5.2	Results	12.5.4
12.5.2.1	PROJECT FOOTPRINT LEADING TO HABITAT LOSS AND FRAGMENTATION	12.5.4
12.5.2.2	SENSORY DISTURBANCE LEADING TO CHANGES IN HABITAT QUALITY	12.5.5
12.5.2.3	DIRECT AND INDIRECT HABITAT LOSS LEADING TO CHANGE IN CARIBOU ABUNDANCE.....	12.5.7
12.5.2.4	USE OF LINEAR CORRIDORS BY WOLVES LEADING TO CHANGE IN PREDATION RATE	12.5.7
12.5.2.5	EFFECTS TO HARVESTING OPPORTUNITIES	12.5.8
12.6	Determination of Significance	12.6.1
12.6.1	Methods.....	12.6.1
12.6.2	Results	12.6.1

12.7	Uncertainty.....	12.7.1
12.7.1	Reasonably Foreseeable Projects	12.7.3
12.8	Monitoring.....	12.8.1
13.	WATER FLUCTUATIONS IN THE TALTSON RIVER WATERSHED	13.1.1
13.1	Introduction	13.1.1
13.1.1	Taltson Expansion Project and Taltson River Watershed.....	13.1.1
13.1.1.1	TALTSON RIVER BIOPHYSICAL HISTORY.....	13.1.4
13.1.1.2	NONACHO DAM	13.1.5
13.1.1.3	TWIN GORGES FOREBAY.....	13.1.8
13.1.2	Mitigation and Monitoring.....	13.1.10
13.1.2.1	NONACHO LAKE CONTROL FACILITY.....	13.1.10
13.1.2.2	TWIN GORGES GENERATION FACILITIES.....	13.1.10
13.1.2.3	SOUTH VALLEY SPILLWAY	13.1.10
13.1.2.4	CONSTRUCTION ACCESS.....	13.1.10
13.2	Methodology	13.2.1
13.2.1	Taltson River Assessment Methodology	13.2.1
13.3	Alterations of Water Quantity	13.3.1
13.3.1	Introduction	13.3.1
13.3.1.1	TALTSON BASIN DESCRIPTION	13.3.1
13.3.1.2	SUMMARY OF EXISTING AND PROPOSED TWIN GORGES HYDROELECTRIC FACILITIES.....	13.3.3
13.3.2	Taltson Basin Flow Model Expansion Scenarios for the Taltson River.....	13.3.4
13.3.2.1	TWIN GORGES FOREBAY MODEL REPRESENTATION	13.3.5
13.3.2.2	NONACHO LAKE	13.3.8
13.3.3	Expansion Scenario Model Results and Comparison to Baseline	13.3.11
13.3.3.1	NONACHO LAKE	13.3.12
13.3.3.2	ZONE 1 – TALTSON RIVER FROM THE NONACHO DAM TO THE TAZIN RIVER.....	13.3.16
13.3.3.3	ZONE 2 – TRONKA CHUA GAP TO LADY GREY LAKE	13.3.36
13.3.3.4	ZONE 3 – TALTSON RIVER FROM TAZIN RIVER TO TSU LAKE.....	13.3.41
13.3.3.5	ZONE 4 – TSU LAKE TO GREAT SLAVE LAKE	13.3.63
13.3.4	Ramping from Annual Scheduled Outages	13.3.68
13.3.5	Summary	13.3.70
13.4	Alteration of Water Quality	13.4.1
13.4.1	Introduction	13.4.1
13.4.2	Existing Environment	13.4.3
13.4.2.1	WATER QUALITY PARAMETERS	13.4.3
13.4.2.2	NONACHO LAKE	13.4.6
13.4.2.3	ZONE 3	13.4.6
13.4.2.4	ZONES 1 AND 2.....	13.4.14

	13.4.2.5	ZONE 4	13.4.14
13.4.3		Typical Hydro Project Effects on Water Quality	13.4.18
	13.4.3.1	GENERAL CHEMISTRY CHANGES	13.4.18
	13.4.3.2	MERCURY.....	13.4.18
	13.4.3.3	TEMPERATURE AND DISSOLVED OXYGEN STRATIFICATION.....	13.4.20
	13.4.3.4	EUTROPHICATION	13.4.20
	13.4.3.5	EROSION AND DEPOSITION	13.4.20
13.4.4		Screening Potential Effects in Taltson Basin	13.4.20
	13.4.4.1	INTRODUCTION	13.4.20
	13.4.4.2	SCREENING POTENTIAL EFFECTS	13.4.21
	13.4.4.3	SUMMARY	13.4.23
13.4.5		Predicted Alterations to Water Quality.....	13.4.23
	13.4.5.1	INTRODUCTION	13.4.23
	13.4.5.2	OVERVIEW OF MODELLED FLOW AND WATER LEVELS	13.4.23
	13.4.5.3	ASSESSMENT CRITERIA	13.4.26
	13.4.5.4	PREDICTED WATER QUALITY CHANGES	13.4.26
13.4.6		Ramping	13.4.40
	13.4.6.1	PREDICTED WATER QUALITY CHANGE.....	13.4.41
13.4.7		Uncertainty.....	13.4.41
	13.4.7.1	WATER LEVELS AND WATER FLOWS	13.4.41
	13.4.7.2	DOWNSTREAM EFFECTS.....	13.4.42
13.4.8		Summary	13.4.42
13.4.9		Future Monitoring.....	13.4.43
13.5		Bioaccumulation of Mercury	13.5.1
13.5.1		Introduction	13.5.1
13.5.2		Background	13.5.2
	13.5.2.1	METHYLMERCURY CYCLING IN THE ENVIRONMENT.....	13.5.2
	13.5.2.2	FACTORS CONTRIBUTING TO ACCUMULATION	13.5.5
	13.5.2.3	METHYLMERCURY TOXICITY	13.5.6
	13.5.2.4	CCME GUIDELINES	13.5.6
13.5.3		Existing Environment	13.5.9
	13.5.3.1	ECOLOGICAL RELEVANCE	13.5.9
	13.5.3.2	HUMAN RELEVANCE	13.5.12
13.5.4		Mercury Modelling in Fish Tissue.....	13.5.16
	13.5.4.1	INTRODUCTION	13.5.16
	13.5.4.2	METHODS.....	13.5.17
	13.5.4.3	MODEL INPUTS	13.5.17
13.5.5		Results and Discussion.....	13.5.22
	13.5.5.1	36 MW OPTION	13.5.22
	13.5.5.2	56 MW OPTION	13.5.24
13.5.6		Uncertainty.....	13.5.27
	13.5.6.1	BASELINE MERCURY BODY BURDEN	13.5.27
	13.5.6.2	WATER LEVELS AND SURFACE AREA	13.5.27

13.5.7	13.5.6.3	MERCURY MODEL.....	13.5.27
	Summary		13.5.28
	13.5.7.1	36 MW SUMMARY	13.5.29
	13.5.7.2	56 MW SUMMARY	13.5.29
13.5.8	Future Monitoring.....		13.5.30
13.6	Alteration of Ice Structure		13.6.1
13.6.1	Introduction		13.6.1
	13.6.1.1	ICE FREEZE-UP PROCESS.....	13.6.1
13.6.2	Available Data for Taltson River		13.6.6
	13.6.2.1	METEOROLOGICAL DATA	13.6.6
	13.6.2.2	FLOW DATA.....	13.6.6
	13.6.2.3	ICE OBSERVATION REPORTS	13.6.6
13.6.3	Potential Change to Ice Structure in the Taltson River		13.6.11

TABLE OF PLATES

Plate 6.1.1 — Nonacho Lake Spillway and Rockfill Dam.....	6.1.7
Plate 6.1.2 — Twin Gorges Plant.....	6.1.7
Plate 6.1.3 — South Valley Spillway.....	6.1.8
Plate 6.1.4 — Taltson River Downstream of Nonacho Lake.....	6.1.11
Plate 6.1.5 — Tazin River below Tazin Lake: October, 2008	6.1.12
Plate 6.1.6 — Twin Gorges Forebay with Taltson River in Background	6.1.16
Plate 6.1.7 — Twin Gorges Plant from Downstream	6.1.16
Plate 6.1.8 — Trudel Creek: Headwaters at South Valley Spillway.....	6.1.18
Plate 6.1.9 — Trudel Creek: Low Gradient Zone in Upper Valley	6.1.18
Plate 6.1.10 — Trudel Creek: Higher Gradient Zone.....	6.1.19
Plate 6.1.11 — Nonacho Lake Control Structure from Upstream	6.1.22
Plate 6.1.12 — Tronka Chua Gap.....	6.1.22
Plate 6.1.13 — Existing Twin Gorges Transmission Line: Example of River Crossing.....	6.1.23
Plate 6.1.14 — Existing NWT Transmission Line: Example of Line Corridor.....	6.1.24
Plate 6.1.15 — Ossberger Turbines at Twin Gorges Plant.....	6.1.26
Plate 6.4.1 — Nonacho Lake Structure	6.4.7
Plate 6.5.1 — Typical Winter Road Corridor from Fort Smith to Twin Gorges.....	6.5.7
Plate 6.5.2 — Typical Forested Terrain on Proposed Winter Route in Area of Methleka Lake (Southern Sector).....	6.5.8
Plate 6.5.3 — Typical Forest and Rock Terrain on Proposed Winter Route in Area of Nonacho Lake (Southern Sector).....	6.5.8
Plate 6.5.4 — Typical Wetland Terrain on Proposed Winter Route in Area Between Twin Gorges and Lady Grey Lake (Southern Sector).....	6.5.9
Plate 8.4.1 — Typical Terrain Features in the Simpson Islands: Southern Section	8.4.10
Plate 8.4.2 — Typical Terrain Features in the Simpson Islands: Northern Section	8.4.11
Plate 8.4.3 — Northwest Option of East Arm Route with Small Rocky Islets Showing Crossing Points	8.4.15
Plate 9.5.1 — Pete Enzoe of Łutsel K'e during Aerial Survey: February 2006	9.5.57
Plate 9.5.2 — Caribou and Snow Tracks near the Lockhart River: February 2006	9.5.57
Plate 9.5.3 — Caribou Trail near Lac de Gras.....	9.5.59
Plate 13.3.1 — South Valley Spillway.....	13.3.8
Plate 13.7.1 — Sedge-Willow Community at Site TW26 in Zone 1	13.7.6
Plate 13.7.2 — Sedge-Horsetail Community at Site TW21 in Zone 1	13.7.6
Plate 13.7.3 — Sedge-Rush Community at TW19 in Zone 1	13.7.7

Plate 13.7.4 — Sedge Riparian Marsh Community at TW27 in Zone 1	13.7.7
Plate 13.7.5 — Sedge-Birch Fen Community at TW25 in Zone	13.7.8
Plate 13.7.6 — Sedge-Leatherleaf Fen Community at TW36 in the Nonacho Lake Zone	13.7.9
Plate 13.7.7 — Sedge Bog Community at TW33 in the Nonacho Lake Zone	13.7.11
Plate 13.7.8 — Unconfirmed Wetland Communities in Zone 2	13.7.12
Plate 13.7.9 — Unconfirmed Wetland Communities in Zone 2	13.7.12
Plate 13.7.10 — Unconfirmed Wetland Communities in Zone 2	13.7.13
Plate 13.7.11 — Ecological Assembly Survey Locations	13.7.15
Plate 13.7.12 — Standing Dead Trees in Nonacho Lake Zone Bog	13.7.37
Plate 13.7.13 — Original Forest Floor in the Soil Profile of a Nonacho Lake Bog	13.7.37
Plate 13.8.1 — Nonacho Lake	13.8.3
Plate 13.8.2 — Twin Gorges Forebay	13.8.3
Plate 13.8.3 — Taltson Lake	13.8.21
Plate 13.8.4 — Tronka Chua Gap	13.8.22
Plate 13.8.5 — Twin Gorges Forebay and the South Valley Spillway	13.8.22
Plate 13.8.6 — Twin Gorges Forebay and the Lower Taltson River	13.8.23
Plate 14.4.1 — Tension Cracks at Site 1	14.4.16
Plate 14.4.2 — Sand and Cobblestone Banks at Site 2	14.4.17
Plate 14.4.3 — Cobblestone Armouring Bank at Site 3	14.4.17
Plate 14.4.4 — Erodible Mudslide Region at Site 3	14.4.18
Plate 14.6.1 — Sedge-Horsetail Riparian Marsh at (TW7)	14.6.2
Plate 14.6.2 — Sedge-Horsetail-Calamagrostis Riparian Marsh at (TW15)	14.6.4
Plate 14.6.3 — Sedge Riparian Marsh at (TW9), Zone 5	14.6.5
Plate 14.6.4 — Sedge-Rush Riparian Marsh at (TW4), Zone 5	14.6.5
Plate 14.6.5 — Sedge-Willow Riparian Marsh at (TW1), Zone 5	14.6.6
Plate 14.6.6 — Ecological Assembly Survey Locations	14.6.7
Plate 14.7.1 — Trudel Creek Mainstem Banks Dominated by Wetland and Bedrock	14.7.4
Plate 14.7.2 — Trudel Creek Littoral Habitat Expected to be Influenced by Reduction in Water Levels	14.7.19
Plate 14.7.3 — Trudel Creek Cliff-Type Habitat Expected to have Negligible Effects as a Result of Reduction in Water Levels	14.7.21
Plate 14.7.4 — Trudel Lake Littoral Habitat (Sampled in 2008 for Benthic Invertebrate Communities)	14.7.48
Plate 14.7.5 — Unnamed Lake Littoral Habitat	14.7.49
Plate 15.2.1 — Proposed Inlet Location of the North Gorge Canal	15.2.17
Plate 15.2.2 — Proposed Tailrace Location of the North Gorge Canal	15.2.17
Plate 15.2.3 — Minimum Release Structure Location and Habitat Map	15.2.18
