Mr. Vern Christensen
Executive Director,
Mackenzie Valley Environmental Impact Review Board
200 Scotia Centre
Box 938, 5102-50th Ave
Yellowknife, NT X1A 2N7

February 03, 2011

**Re: Taltson Hydro Expansion Project
Review Board January 10, 2011 request for Revised Routing Proposal and Likelihood of Associated
Environmental Impacts**

In a letter to Parties dated January 10th, 2011, the Review Board requested that Dezé Energy submit, no later than February 07th, 2011:

- A revised routing proposal for the hydroelectric transmission line around the East Arm of Great Slave Lake that avoids crossing the Lockhart River, and
- An analysis of the likelihood of environmental impacts resulting from the proposed revision to the transmission line routing.

Dezé Energy respectfully requests an extension for submission of the above information to March 07th, 2011.

The extension will enable Dezé Energy to review the technical feasibility of an alternate route, identify and scope the likely environmental impacts, identify if studies and assessments undertaken to date remain applicable and accurate for the revised routing, and amend assessments if required.

Please contact me at (867) 766-5078 or email DGrabke@nwtec.ca if you have any questions in regard.

Yours Sincerely,

Dan Grabke,
Managing Director
