Taltson Hydroelectric Expansion Project

January 29<sup>th</sup>, 2010

To: All Parties

**Re: Partial Closure of the Public Record**

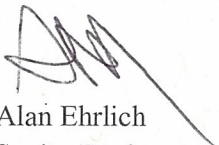

Please be advised that the public record for this environmental assessment will be closed to new evidence from parties after today.

The only exception will be for information on issues relating to the proposed transmission line route adjustment made to avoid crossing the Lockhart River. The currently proposed route follows Fairchild Point between Charlton Bay and McLeod Bay. An outline of this part of the route is posted on the Review Board website titled "Adjustments to Transmission Line Route", dated January 26<sup>th</sup>, 2010.

([http://www.reviewboard.ca/registry/project\\_detail.php?project\\_id=68&doc\\_stage=14](http://www.reviewboard.ca/registry/project_detail.php?project_id=68&doc_stage=14))

The Review Board wishes to ensure that parties have the opportunity to provide their views regarding this route adjustment, and will accept submissions related to this subject only, **until 5:00 pm on February 18<sup>th</sup>, 2010**. No documents pertaining to other subjects will be added to the public registry.

Sincerely,

Alan Ehrlich  
Senior Environmental Assessment Officer  
Mackenzie Valley Environmental Impact Review Board
