Subject: re: Giant Mine Environmental Assessment Public Registry Filing #2
Attachments: ATT61550.dat; ATT61551.dat

Alan

Here are two more documents that Alternatives North would like to file on the public registry for the Giant Mine Environmental Assessment.

These two documents pertain to the disposal of nuclear waste and spent fuel in the United Kingdom. They were prepared by the Nuclear Decommissioning Authority and relate to scenario development and risk assessment for potential facilities in the UK. The level of detail for perpetual care planning and assessment is quite interesting compared to what is available for the Giant Mine Remediation.

The two documents are also found at:
