>>

>> I see from today's Yellowknifer that AANDC is holding information sessions next week about "upcoming work at Giant Mine".

>>

>> I am out of town next week for my paid work. A little more notice of such events would be appreciated in the future.

>>

>> If these sessions are about the Site Stabilization Plan, will AANDC be holding some separate consultations with the parties to the on-going Environmental Assessment? Given that the project is in an Environmental Assessment, some direct consultation would be appreciated and would be more appropriate.

>>

>> Earlier this week I sent an e-mail about whether AANDC/PWGSC intends to hold another technical session in reply to the concerns raised in our letter of March 8, 2012 about the responses to the second round of Information Requests. Do you know when you will be in a position to respond? Thanks.
