**Re: Environmental Assessment of the Prairie Creek Mine EA0809-002
Developer's Assessment Report presentation**

Dear Mr. Harpley:

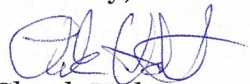

The Mackenzie Valley Review Board (Review Board) is preparing to enter the analytical phase in the environmental assessment of the Prairie Creek Mine. The Review Board notes that it has been over 18 months since the scoping sessions for the Prairie Creek Mine took place in various Northwest Territories communities.

In order to re-engage interested parties and the public and to show-case your project, the Review Board encourages Canadian Zinc Corporation to present the Developer's Assessment Report at an open house event in Yellowknife and possibly other communities as well.

The timing and location of an open house event is at your discretion and would be facilitated and organized by Canadian Zinc Corporation.

If you have any questions, please contact me by phone or email.

Sincerely,

Chuck Hubert
Environmental Assessment Officer
Mackenzie Valley Review Board
