Re: Prairie Creek Mine modifications

Dear Mr. Harpley:

The purpose of this letter is to follow-up on our phone conversation regarding possible modifications to the Prairie Creek Mine project that may result from meetings between Canadian Zinc Corporation and parties regarding site-specific water quality objectives.

In recent correspondence, parties requested the opportunity to review and provide recommendations on any modifications to project design during this environmental assessment. If additional or modified project components or activities are proposed, please describe them and assess related impacts, including any adverse and beneficial impacts.

The Review Board has set a due date for final submissions from parties at September 6, 2011. In the interests of fairness, it would be extremely helpful to parties and the Review Board if any project modifications or additional components are provided to the Review Board by August 5, 2011.

If you have any questions, please contact me by phone or email.

Sincerely,

A handwritten signature in black ink, appearing to read "Chuck Hubert".

Chuck Hubert
Environmental Assessment Officer
Mackenzie Valley Review Board
