RE: Clarification of November 15th, 2011 letter for party status application

Tyhee NWT Corp. has not yet issued responses to the Board's August information requests. Once Tyhee submits those responses, participants may submit their own information requests. However, party status is required to submit information requests. In the interest of timely and efficient environmental assessments, the November 15, 2011 call for party status was intended to reduce any delay between party registration and submission of information requests.

The current stage of this environmental assessment remains the Information Request stage. For concerns or questions, please contact the Review Board.
