

EA1112-001
Debogorski Diamond Exploration

May 27, 2011

Distribution List:

Re: Distribution of final Work Plan and process to determine relevant Public Registry files

On May 26, 2011 the Review Board met to consider comments received on the draft Work Plan for the Debogorski - Diamond Exploration Project Environmental Assessment and to finalize the document. A final Work Plan has been approved and is attached.

The specific date and logistics for the upcoming Community Information Session will be communicated to parties when this information is available. Review Board staff will be in touch with Parties outside of Yellowknife to discuss transportation logistics shortly.

Finally, the Review Board will be conducting a review of the registries of past Shoreline Zone EAs (EA03-002, EA03-003, EA03-004, EA03-006, EA0506-005, and EA0506-006) to identify relevant documents that will be transferred to the public registry for EA1112-001. A list of documents, as well as the rationale for their inclusion, will be circulated and parties will be provided with an opportunity to provide comments to the Board prior to the files being transferred. The review process is initiated immediately.

Sincerely,

Darha Phillipot
Environmental Assessment Officer
Mackenzie Valley Review Board
