Debogorski, Diamond Exploration Project, Drybones Bay

Re: Site Visit- July 21, 2011

This Note to File describes the July 13, 2011 Site Visit to the Debogorski Project Area.

Background

Review Board members, staff, and the developer travelled by boat to the developer's proposed project area, located at the Snowfield Camp. The following people were in attendance:

Alex Debogorski, Developer
Daryl Bohnet, Board Member
Percy Hardisty, Board Member
Danny Bayha, Board Member
James Wah-shee, Board Member
Richard Mercredi, Board Member
Peter Bannon, Board Member
Chuck Hubert, Board Staff
Darha Phillpot, Board Staff
Alan Ehrlich, Board Staff
Travis Schindel, Board Staff

Greg Robertson of Bluefish Services was the outfitter/tour provider. He and three staff transported Board members to the camp and back.

Visit to 2 Drill Targets

The developer showed the Board the proposed location for the two initial drill holes. He noted:

- Drills will be located directly on or adjacent to the roads at the Snowfield Camp;
- Drilling will be on an angle and to a depth of 300 feet;
- Water will be drawn from Great Slave Lake, although the specific location has not been determined. He will follow all regulations for water withdrawal and

- disposal; Drill cuttings will be disposed of as per land use regulations;
- The drill that is currently on site will be used, assuming it is still there when developer does his drilling; and
 - Drilling will be done one target at a time.

Camp Accommodation

- The developer showed the Board the Snowfield camp facilities and noted that if the camp facilities are still available i.e., not yet removed from the area he and his driller would stay there.
- If Snowfield camp is no longer available Debogorski proposes to set up a tent on the site where Snowfield camp currently is located.

Claim Block

- The developer pointed out the extent of his claim to the Board.

Snowfield Camp

- The Board took the opportunity to walk around Snowfield camp and surrounding area, including the Snowfield Pit.
