McKenzie Valley Environment Report Review
Merry Christmas

To whom it concerns.

Re Highway. Do we need to do an assessment on highways?

My understanding of the McKenzie Valley Resource Act was mainly to do with Oil & gas, Mining Dams and Pipelines. Maybe I'm wrong, but to me it's a waste of time and money, we got right way all over the country and I don't see any problems with it.

Talking to one of the assessment staff mentioned that we have to do it on social problems it's going to cause Alcohol & drugs and whatever. We have those problems in every communities highway or no highway and a Happy New Year.
