

May 18, 2016

Dear Ms De Souza,

As a party to EA1415-01, CPAWS-NWT, our topics of interest and key lines of inquiry for the June Technical Sessions with CZN are as follows:

- Borrow Pits
  - Site evaluations and potential disturbance to species at risk.
- Fish & Wildlife
  - Species at risk disturbance mitigations
- Road Access & Monitoring (Design & Operations)
  - Plans for monitoring and controlling access are all hypothetical up to this point.
  - Parties require an actual plan to be able to evaluate if access and monitoring will be adequate.

Thank you.

Shannon Moore
