### **Re: Clarification of Adequacy Review Items**

The Review Board staff met with Canadian Zinc Corporation (CanZinc) on Monday June 15, 2015. The purpose of the meeting was to provide clarification on some of the adequacy review items. The key areas of concern identified by CanZinc were:

1. baseline study requirements
2. the level of engineering design for the road
3. management plans, and
4. the overall level of detail expected for the DAR.

CanZinc will be submitting a letter to the Review Board outlining its concerns and proposed resolutions for progressing through the EA in the near future. The letter will describe in detail its positions on the concerns identified above.

If you have any questions the contact for the Project is:
