To: Distribution List

**Re: Technical sessions on cultural impacts to be held Nahanni Butte and Fort Simpson July 4 and 5**

The Review Board is hosting technical sessions on cultural impacts from the proposed Prairie Creek Mine All Season Road in Nahanni Butte and Fort Simpson. The purpose of the technical sessions is to gather information from land and resource users about these potential impacts and possible mitigations from community members in the two Dehcho communities.

The Review Board will host technical sessions on cultural impacts as follows:

- July 4 – Nahanni Butte, after the community lunch to 7 pm, Community Gym
- July 5 – Fort Simpson, 2 pm – 7 pm, Recreation Centre, Small Hall

The technical sessions on cultural impacts will be hosted by an independent facilitator. Review Board members will not be present. A report of the technical sessions will be prepared by the independent facilitator and submitted to the Review Board for the public registry.
