## Notice of Proceeding

EA1415-01

Prairie Creek All Season Road Project, Canadian Zinc Corporation

---

To: Distribution List

### Re: Technical session timing

The Review Board stated in its *Update to Adequacy Requirements for the Developer's Assessment Report*<sup>1</sup> that technical sessions for the Prairie Creek All-season Access Road environmental assessment would be scheduled a minimum of four weeks after outstanding adequacy items were submitted by Canadian Zinc Corporation (CanZinc). Initially, the Review Board proposed a submission date of February 19<sup>th</sup>, 2016 for these outstanding items and a four-week response period to information requests. Technical sessions would have taken place the third week of March, 2016.

CanZinc emailed<sup>2</sup> the Review Board on February 12<sup>th</sup>, 2016 explaining that it expects to submit adequacy items in mid-March. For this reason, the technical sessions will not take place in the third week of March as originally proposed. Canzinc also said that it would provide a new proposed submission date at a later time. The Review Board will not schedule the technical sessions until CanZinc provides further information about submission dates for both the outstanding adequacy items and responses to information requests.

The contacts for this environmental assessment are Environmental Assessment Officers Sachi De Souza (867) 766-7054; [sdesouza@reviewboard.ca](mailto:sdesouza@reviewboard.ca) and Kate Mansfield (867)766-7062; [kmansfield@reviewboard.ca](mailto:kmansfield@reviewboard.ca).
