Categories: Project deadlines

Hi David,

Thank you for the update. We will consider a site visit; however, unfortunately it will likely not be feasible this season.

Subject: DAR Addendum

Chuck,

FYI, we're hoping to submit our addendum by month end.

On another matter, I imagine we will be holding meetings and possibly a hearing before next summer. It occurs to me that staff and Board members, and possibly consultants, will be forming opinions without a suitable familiarity of the road and terrain, placing you, and therefore us, at a disadvantage. Therefore, I strongly recommend that you undertake a site visit before the fall, which is really mid-September. I believe this should be mandatory for all new EA's.

I recommend you use a helicopter based out of Fort Simpson. I realize not everyone could participate, but I think it would be very valuable for at least a few staff and Board members to do so. You could have 2 groups, one to fly the road into the Mine, and one to fly on the return. I can advise you on logistics if you wish.

Regards.
