**RE: MVEIRB Proposed Scoping Document: Chedabucto Mineral Exploration Development EA1415-02, Husky Oil Operations Limited**

Husky Oil Operations Limited (“Husky”) applied for a Land Use Permit to conduct an exploration program to delimit a silica deposit on its Chedabucto mineral claims located on the north arm of Great Slave Lake. After a review and preliminary screening, the Wek’eezhii Land and Water Board determined that there “might be cause for public concern”, and referred the application to the Mackenzie Valley Environmental Impact Review Board (“MVEIRB”) to conduct an Environmental Assessment.

On March 15, 2015, the MVEIRB issued a *Proposed Scoping Document* (EA1415-02) that outlined the proposed process and contained the proposed scope of development and assessment. The deadline for reviewers to submit comments and IRs was April 10, 2015. The deadline for the developer to submit responses is April 24, 2015.

Husky herein requests that the deadline for submitting responses to the IRs be extended to April 30, 2015. The additional time is needed to complete an internal review of responses before they are submitted to the Registry.
