My name is Rodney Callahan, I am a long time resident hunter of yellowknife and surrounding area such as white beach point, myself and many other northerners use this area yearly for hunting purposes, the area is abundant with moose which we hunt, as a result of very busy winter roads over the past 15 years our caribou don't come around anymore thus causing no tags for caribou for the past 8 years, I would hate to loose another area to mining activity in the white beach area, in addition to harming fish habitat. So please consider this letter when making your decision regarding permits to Husky oil, thank you, sincerely: Rodney Callahan, you may text me at
