### EA2021-01 – Pine Point Mine Project Meeting between Review Board staff and Pine Point Mining Limited

---

On October 7, Review Board staff met with representatives from Pine Point Mining Limited (PPML) and a representative from its consulting team.

#### Participants:

PPML: Jeff Hussey, Andrew Williams, Kristine Mason (WSP Golder)

Review Board staff: Mark Cliffe-Phillips, Alan Ehrlich, Chuck Hubert

PPML provided an update on activities over the past summer intended to fulfill Terms of Reference requirements in preparation of its Developer's Assessment Report for the Pine Point Mine Project. The developer conducted baseline field work at the proposed mine site including hydrology work and wildlife surveys. PPML hosted tours of the property with local community residents this summer and is planning community engagement and open house events in local communities in the fall.

PPML and the Review Board discussed that not all of the requirements listed in the Terms of Reference may be led by the proponent and that some may be led by the Review Board (e.g., aspects of culture and social conditions). PPML and the Review Board agreed to future discussions to confirm alignment on approach.

PPML was not able to provide an estimate on when it will submit its Developer's Assessment Report but will keep the Review Board informed on timelines for preparing the document.

Review Board staff offered to continue meeting with Pine Point Mining Limited to clarify Terms of Reference requirements.
