Re: Tłıchq All-Season Road Project – corrections to measure 6-3 in August 15 response and Ministerial references

On August 15th, 2018, the Review Board submitted its recommended revisions to the GNWT and Responsible Ministers, in response to proposed modifications of Tłıchq All-Season Road Environmental Assessment measures.

The following paragraph was inadvertently omitted from the wording of measure 6-3 on pages 11,12,15 and 18 of the attachment to the August 15th, 2018 letter:

“The developer will make funding available to the parties to support this consultation and collaboration. The developer will submit a draft and a final plan as described below. Once approved, the developer will operate in accordance with the plan.”

No modifications were proposed to this paragraph by GNWT-Lands and Responsible Ministers. It remains unchanged as part of measure 6-3. The corrected version of the letter has been uploaded to the public registry.

In addition, the Review Board is clarifying that its references to the GNWT’s consult-to-modify process refers to the GNWT Minister of Lands and Responsible Ministers’ consult-to-modify process.
